	EXECUTIVE SUMMARY4
	CHAPTER ONE8
	1. General Education8
	1.1. Pre-Primary Education8
	1.1.1. Overview8
	1.1.2. School Information.....8
	1.1.3. Enrolment in Pre-Primary Education10
	1.1.4. Gross Enrolment Rates in Pre-primary Education14
	1.1.5. Teachers in Pre-primary Schools16
	1.1.6. Quality Indicators in Pre-Primary Education17
	1.1.6.1. Pupil Teacher Ratio (PTR).....17
	1.1.6.2. Pupil Section Ratio (PSR).....17
	2. Primary Education18
	2.1. Primary Schools Information18
	2.1.1 Number of Primary Schools by Ownership, Cycle & Number of CRCs.....18
	2.1.2. Geographical Locations of Primary First Cycle (Grade 1-4) Schools in the Region.....31
	2.1.3. Geographical Locations of Primary Second Cycle (Grade 5-8) schools32
	2.1.4. Geographical Locations of All Primary (Grade 1-8) Schools.....33
	2.2. Primary Enrolment and Enrolment Rates.....33
	2.2.1. Intake Rates33
	2.2.2. Gross Enrolment Rate (GER).....40
	2.2.3. Net Enrolment Rate (NER)49
	2.2.4. Enrolment of Children with Special Needs.....56
	2.2.5. Orphans in Primary Schools.....76

2.3. Primary Enrolment	79
2.3.1. New Entrants in primary Education	79
2.3.2. Grade1-8 Enrolment.....	81
2.4. Primary Gender Equity in the Last Five Years	93
2.5. Quality of Primary Education	96
2.5.1. Teachers in Primary Education	96
2.5.2. Education Quality Indicators.....	104
2.5.2.1. Pupil Teacher Ratio and Pupil Section Ratio	104
2.6. Primary Schools Facilities.....	110
2.6.1. Primary Schools Toilet Information.....	110
2.6.2. Primary Schools Water Supply Information	114
2.6.3. Primary Schools Electric Power Information.....	116
2.6.4. Primary Schools Mini Media Information, HIV/AIDS and Co-Curricular Information	118
2.8 Efficiency of Primary Education.....	122
2.9. Internal Efficiency and Flow Rate	127
2.10. Primary Education Cohort Analysis.....	144
3. Secondary Education	160
3.1. Secondary and Preparatory Schools Information.....	160
3.1.1. Geographical Locations of Secondary schools	162
3.2. Equitable Access of Secondary and Preparatory Schools	162
3.2.1. Gross Enrolment Rate (GER) of General Secondary Education Grade (9-10).....	163
3.2.2 .Net Enrolment Rate (NER) in Secondary First Cycle (9-10).....	165
3.2.3. Gross Enrolment Rate (GER) of Preparatory (11-12).....	168
3.2.4. Net Enrolment Rate (NER) of Preparatory (11-12)	170
3.2.5. Student Enrolment in Secondary Schools	173
3.2.6. Preparatory Enrolment by Stream	178
3.2.7. Secondary & Prep. Schools Special Need Education Enrolment by Type of Disability	179
3.3. Quality Indicators of Secondary & Preparatory Education.....	190
3.3.1. Secondary & Preparatory School Teachers qualification	190
3.3.2. Secondary& Preparatory (9-12) Teaching Staff by Specialization, Rank & Salary Scale ...	194
3.3.3. Secondary Grade 9-12, Natural Science & Mathematics Teachers	196

3.4. Ratios in Secondary and preparatory Education	202
3.5. Secondary Education Principals and Vice Principals	206
3.6. Secondary Schools Laboratory and Library Availability.....	230
3.7. Co-curricular information	231
3.8. Efficiency in Secondary & Preparatory Schools.....	235
3.8.1. Secondary Education Dropout and Repetition Rates	235
3.8.2 Secondary Education Repeaters & Readmitters	237
3.9. National and Regional Exam Results.....	239
3.9.1. Regional Exam Results	239
3.9.2. National Exam Results	240
4. None Formal Education	242
4.1. Alternative Basic Education /ABE/.....	242
4.2. Integrated Functional Adult Education/IFAE/ Program	252
5. Pastoral Woredas Education Statistical Data.....	256
Chapter Two.....	271
6. College of Teachers Education (CTE).....	271
6.1 Enrolment in Diploma Program	271
6.1.1 Enrolment in Regular Diploma Program	271
6.1.2. College of Teachers Education Evening Enrolment in Diploma Program	273
6.1.3: College of Teachers Education Summer In-Service Diploma Program	274
6.2: Pre-Primary Teachers Training Program	276
6.4: Oromia CTEs Graduates in Diploma Program	278
6.5. 'CTE's Academic and Technical Staff by Education Level	281
6.5.1. Full-time 'CTE's Academic Staff by Education Level	281
6.5.2. CTE Full time and Part time Academic Staff by Academic Rank	281
6.5.3. Oromia CTEs Administrative Staff by Education Level	282
6.5.4. College of Teachers Education Weekend Diploma Program.....	282
6.6. 'CTE's Academic Staff by Education Level and Rank	283
7. Different Indicators by District.....	285

Introduction

Oromia Government Regional State Education Bureau has been preparing Annual Abstract every year in improving and creating conducive work environment to plan and monitor the provision of quality and relevant education for the Region. As known, a year ago we had been launched the preliminary quick abstract from preliminary data for the temporary utilization up to this quick abstract of data base comes to active. Accordingly, starting from the beginning of this year till now, educational data of the year have been collected, entered and verified at Zonal level and then finally the data were verified at regional level recently, So that this temporary annual abstract was compiled and ready for use by now.

Mission

- Producing capable human power that can fight poverty through addressing accessible, equitable, efficient and quality education through formal and non-formal mode of delivery and instituting the culture of democracy and good governance.

Vision

- To see our country to attain middle income country status by educated citizens capable of realizing the Ethiopian renaissance by 2012,

The annual education census exercise allows the Oromia Education Bureau to collect all the necessary data about education in Oromia. This data is used as an input to planning and monitoring the provision of quality and relevant education for the Region. The intention of the census is that to address the information to all stakeholders. In its efforts, Oromia regional Education Bureau in collaboration with Ministry of Education in designing and implementing EMIS both by developing the necessary software and re-engineering practices and procedures to improve its timeliness, accuracy, reliability and availability of information to various users. Despite the numerous efforts, decentralization of the EMIS data base has not taken off at district level due to infrastructure and capacity (human and financial) constraints. However, a lot has been achieved by decentralizing EMIS data base at zonal level. Additionally, success has been made in implementing data management and capacity building at various levels while some challenges are still unsolved.

I. Data Gathering

The ASC 2016/17 G.C covered all educational institutions across the Region. These institutions are distributed in 20 zones, 18 Administrative Towns, 315 districts and 2766 Cluster Resource Centers (CRC) in the Region. The educational data gathering process has passed through;

- The Regional EMIS team conducted the ToT training for all District Education Office (DEO), Zonal/Admin Town Education offices (ZEO) statistician on how to fill annual census questioners, and the ToT trainers also conduct training for CRC supervisors and school directors at CRC level.
- The CRC supervisors, DEO and ZEO statisticians were overseeing the filling, retrieval and authentication of filled questioners by the school Directors,
- The process of gathering data was implemented over a maximum of 20 days, depending on the number and size of institutions in each of the districts.
- Half of the exercises were spent on conducting of the training of trainer workshops at Regional, Zonal and District level for statisticians and CRC supervisors and school principals as well. The objective of the workshops is to create awareness about how to fill the questionnaires. Filling of ASC 2016/17 G.C questionnaires by school directors were completed within 7days.Finally, verification and authentication of the filled census questionnaires have taken place by respective district Education officials
- The last half of the exercise was spent on checking, verification and retrieval of authenticated questionnaires by the Zonal officials and settling conditions for data entering at zonal level.

II. Data Processing and Verification

Data entry had been done by data entry clerks hired to enter data under the supervision of the EMIS technical team at zonal level. It was taken place using the so called StatEduc software that operating on a local area network. During data entry, only data from questionnaires without errors were entered and incorrectly filled questionnaires were either referred to respondents or edited by Zonal staff. After data verification at zonal level, all the data bases were collected and merged at regional level to have regional data. The last process was data verification& refining at regional level by Zonal statisticians under the supervision of regional EMIS team so as to clean errors and ensure its quality.

III. Data Validation

Regional EMIS team carried out verification exercises as sample studies to verify the EMIS database. Following that, the 2016/17 G.C draft of education annual Abstract were developed and then distributed to the directorates and work process of the Regional Education Bureau for comments, and the comments were applied in the refinement of annual abstract development.

EXECUTIVE SUMMARY

The Regional Education Bureau gathers, compiles, analyses and disseminates educational information annually that covers all education subsectors i.e. Pre-primary, Primary, Secondary, Preparatory, Non-formal Education and College of Teachers' Education/CTE. In the same phenomenon, almost all education data has been collected from all institutions then compiled and analyzed in this publication. Students' performance obtained from National and Regional Examination was also analyzed as indicated in the findings. The summary of key findings from the 2016/17G.C ASC by sub-sector is presented here under;

1.1. Pre-Primary Schools

- In 13,756 pre-primary (1657KG, 11,216PPAPS and 883C to C) institutions that responded to the 2016/17 G.C ASC 976,606 (M=514,860 & F=461,746) children have enrolled with a female enrollment share of 47.3%.
- The total number of teachers in Kindergarten schools was 6,209 (M=1,788 & F= 4,421 from which 71% of them are female. The Pupil Teacher Ratio (PTR) of the level is 1:34. Which means every Kindergarten teacher takes care for 34 children. On the other hand, the number of teachers engaged in KG and O-class were 11,267 that led Pupil Teacher Ratio of the level to 81:1.
- There were 5,483 sections in Kindergarten schools that make Pupil Section Ratio (PSR) of KG 39:1 implying that for each Kindergarten classroom there is an average of 39 pupils.
- The proportion of children those enrolled in pre-primary (KG, PPAPS and C to C) to the population of total 4 to 6 years old children in the region is meant to be low, 32.05%. This is an indication that 67.95% of the population is meant to be not in pre-primary.

1.2. Primary Schools

- There were a total of 14,309 primary schools returned the ASC 2016/17G.C questionnaires. Of which 13,335 were Government owned and 974 of them were Non-Governmental.
- The total primary schools enrolment was 7,729,533 (M=4,157,478 and F=3,572,055). Among these 96.8% of them 7,477,050; (M=4,028,976 and F=3,448,074) students were enrolled in government schools. The gender gap of the level has not still reached equal that female have shared only 46.2%.

- Gross Enrolment Ratio of the region have been showing slight increment and reached 102.3% (M=109.2%, F=95.3%) in this academic year. If it is calculated with ABE enrolment this figure can be increased to 104.4% (M= 111.5%, F=97.1%).
- The Net Enrolment Ratio of the region have been reached 95.6% (M=101.4%, F=89.8%). If it is calculated with ABE it is increased to 97.5% (M= 103.5%, F=91.4%).
- A total of 145,679 teachers (M=86,898 and F=58,781) were registered in all primary schools with a gender imbalance of 59.6% in favor of male teachers. The Pupil Teacher Ratio (PTR) of primary education has reached 53:1. In Government schools there were 137,395 (81,610 male and 55,785 female) teachers showing PTR of 52:1 which is almost similar to the overall ratio.
- Teaching-learning process has been given in 129,049 sections during the ASC 2016/17 G.C. If the total number of primary students distributed to these number of sections, the Pupil Section Ratio (PSR) of the level approaches around 60:1.

1.3. Secondary Schools

- In this academic year 1,062 secondary schools (9-10) responded to the ASC of which 971 of them are Government and 91 are Non-Government schools.
- Students enrolled in these schools were 650,145 (M=361,098& F=289,049). Among these students 626,868 (M=349,530&F=277,338)of them are enrolled in Government schools.
- The Gross Enrolment Ratio and Net Enrolment Ratio of the region reached 38.1% (M=42%, F=34.1%) and 17.5 (M=18.0%, F=17.0%) respectively in this academic year.
- 24,763 teachers (17.51% female) were engaged in teaching-learning process during the ASC 2016/17 G.C and the Student Teacher Ratio (STR) was still 26:1 which implies that each teacher in secondary schools has a share of 26 students on average.
- Number of sections that the teaching-learning process has taken place was 10,359 and the Pupil Section Ratio (PSR) of secondary education has reached 63:1.

1.4. Preparatory Schools

- All the 358 preparatory schools responded to 2016/17G.C ASC of which 88.26% of them (316) were government schools.
- 157,638 (M=88,207and F=69,431) students were enrolled in the academic year of which 147,063 (M=82,543 F=64,520)93.29% were in government schools. Share of girls in all

preparatory schools of the year reached 44.04%. This shows that the gender parity gap has still far from average 50% by 5.06%.

- The Gross Enrolment Ratio and Net Enrolment Ratio of the region reached 9.8% (M=10.9%, F=8.7%) and 5.6 (M=5.9%, F=5.4%) respectively in this academic year.
- There were 7266 (7.8% female) teachers engaged in teaching-learning process in all preparatory schools and the student to teacher ratio of preparatory was 22:1. This implies that regionally one teacher teaches 22 students in average in preparatory schools.
- The number of sections register by the 2016/17G.C ASC was 2,974 and the Pupil Section Ratio (PSR) of preparatory reached 53:1.

1.5. ABE and IFAL Program

- 2,360 ABE centers were responded to 2016/17 G.C ASC. Majority of them (94.57%) are owned by Government.
- A total of 152,796 (87,349 male and 65,447 female) learners were enrolled in these ABE centers where 42.84% of them were female. 7,769 Facilitator (32.1% female) have been facilitating in the ABE centers during the ASC 2016/17 G.C and Student to Facilitator Ratio (SFR) of the program was 25:1. This implies that on average each 25 students were attended by one facilitator.
- A total of 26,397 IFAL centers responded to 2016/17 G.C ASC. A total of 2,157,759 (1,178,964 male and 978,795 female) learners were registered in these centers of which 45.4% of them were female.
- 62,742 (M= 36,956 & F= 25,784) facilitators were engaged to deliver the program with integration of different sectors such as Education, Health, Agriculture, Micro Business and the like. Among them 36,842 (58.7%), 10,604 (16.9%), 6442 (10.3%) and 5513 (8.8%) were teachers, hired facilitators, development agents (DA) & Health extension respectively.

1.6. College of Teachers Education

- All the 12 College of Teachers Education (CTE) in the region were responded to 2016/17 G C ASC and all of them are government owned.
- A total of 15,134 (M=7,494 & F=7,640) candidate teachers were registered for all modalities in all CTE institutions, of which 50.48% were female.

- In 12 CTEs a total of 36,752 (M=22,245 & F=14,507) of which 39.47% are female teachers has been joined summer in-service-training program.
- 23,380 (M=14,609 & F=8,771) candidate teachers were enrolled for evening diploma program of which 37.5 % are female in all CTEs.
- A total of 662 instructors/lecturers were registered in all Oromia CTEs, with a gender imbalance of 93.65% in favor of male, with their education level of which 165 BA and 489 MA with 73.87 % of Masters Degree and none of them had PhD.

1.7. Limitations of Data

Responses to the census were received from pre-primary, primary, secondary, preparatory schools, ABE, IFAL centers and college of teachers' institutions. It is vital to note that schools' response has greatly improved especially in the private owned schools. The age data supplied may to some extent have some misreporting since the primary source of data is the school director who may not be very familiar with the correct ages of some of the pupils. Besides to this, in most cases families of pupils are very inadequately managed of their kids' age.

The definitions on schools location were structured in reference to facilities and geographical location. But in practice their characteristics appear different yet they qualify for different geographical location. Categorization of locations by school director was difficult since the terms apply differently and are relative in meaning. This statistical abstract has been compiled from data relating to only the institutions that returned their ASC forms.

CHAPTER ONE

1. General Education

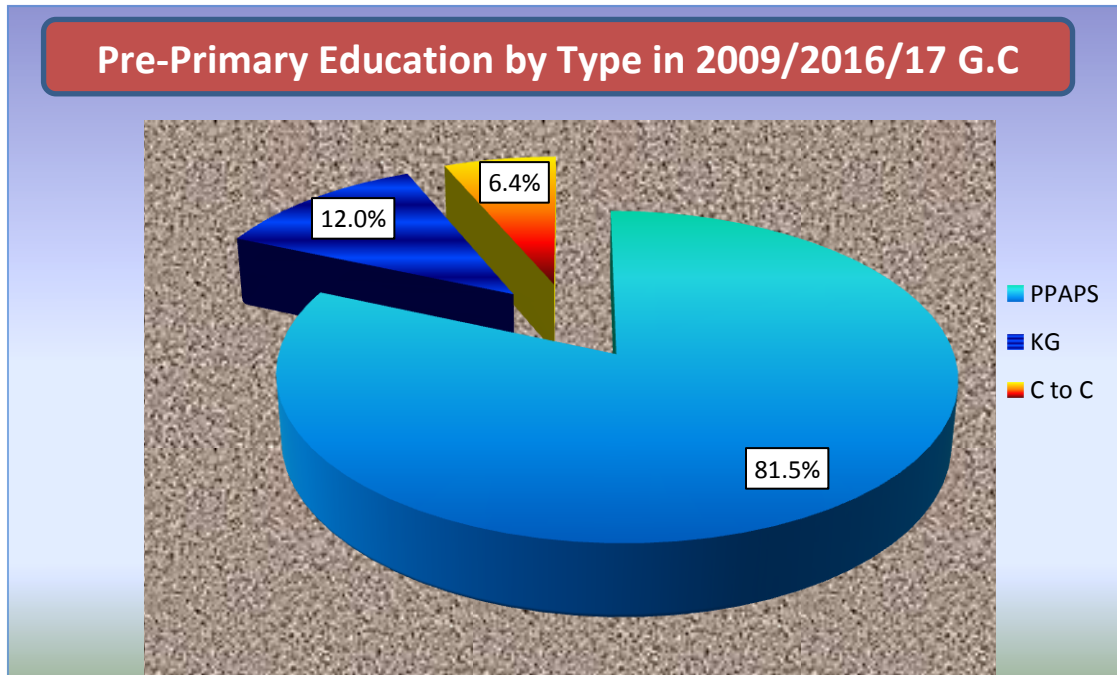

1.1. Pre-Primary Education

1.1.1. Overview

The Oromia National Regional Government Education Bureau recently embarked on development of the pre-primary sub sector since constructive impact on further learning in primary education and beyond significantly dwells on Early Childhood Development (ECD) education. Developments have been undertaken to boost the performance in this subsector to achieve EFA goals; for instance the development of the early childhood curriculum & teacher training are among the achievements. Pre-primary Education basically includes enrollment of children from age 4-6. Non-governmental organizations, communities, private institutions and religious based organizations take the lion share of undertaking the kindergarten program whereas, government is involved in developing curriculum, teachers' training and providing supervisory supports for kindergarten program. Additionally, our Regional Education Bureau has been involving in pre-primary attached to primary schools (PPAPS) and child to child program to access rural children of the level.

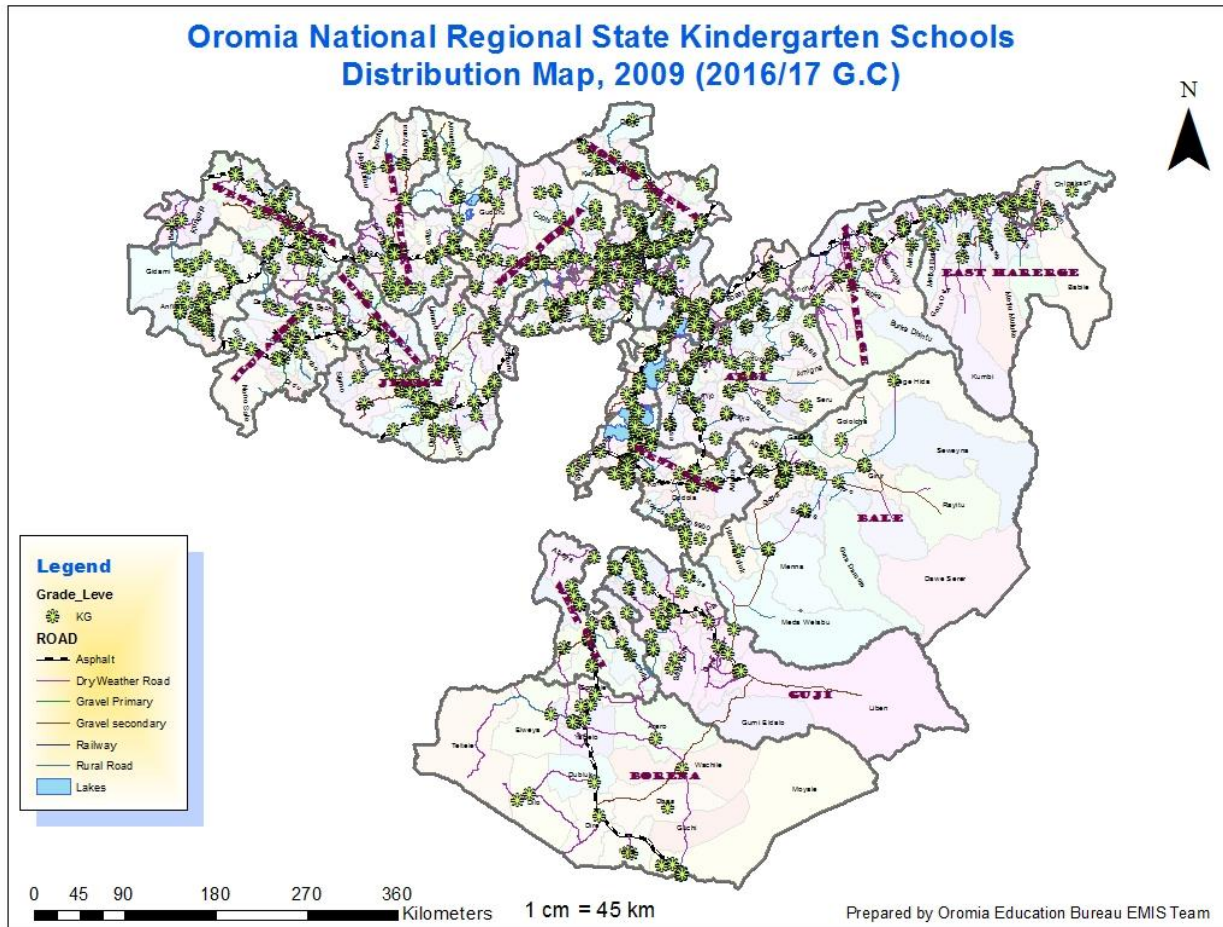

1.1.2. School Information

A total number of 13,756 pre-primary (1,657 KG, 11,216 PPAPS and 883 C to C) institutions where responded to 2016/17 G.C ASC in which 976,606 (M=514,860 & F=461,746) students were enrolled. Graph1 below also tells us the majority of pre- primary schools 11,216 (81.5%) were pre-primary attached to primary schools (PPAPS) followed by KG 1,657(12.04%) and Child to Child centers 883 (6.41%).

GRAPH. 1.1: PRE-PRIMARY EDUCATION BY TYPE

Most Government primary schools, more than 83.5%, have been applying ECDs as annexes. Since the development of the ECD curriculum was supported by Government, there is a direction that all Government primary schools have to conduct the program; that is why most of the schools are currently involved in the implementation of Early Childhood Education.

Results from the ECD census indicate that majority of the ECD centers are attached to primary schools with a percentage composition of 83.5% whereas 16.5% of them are not.

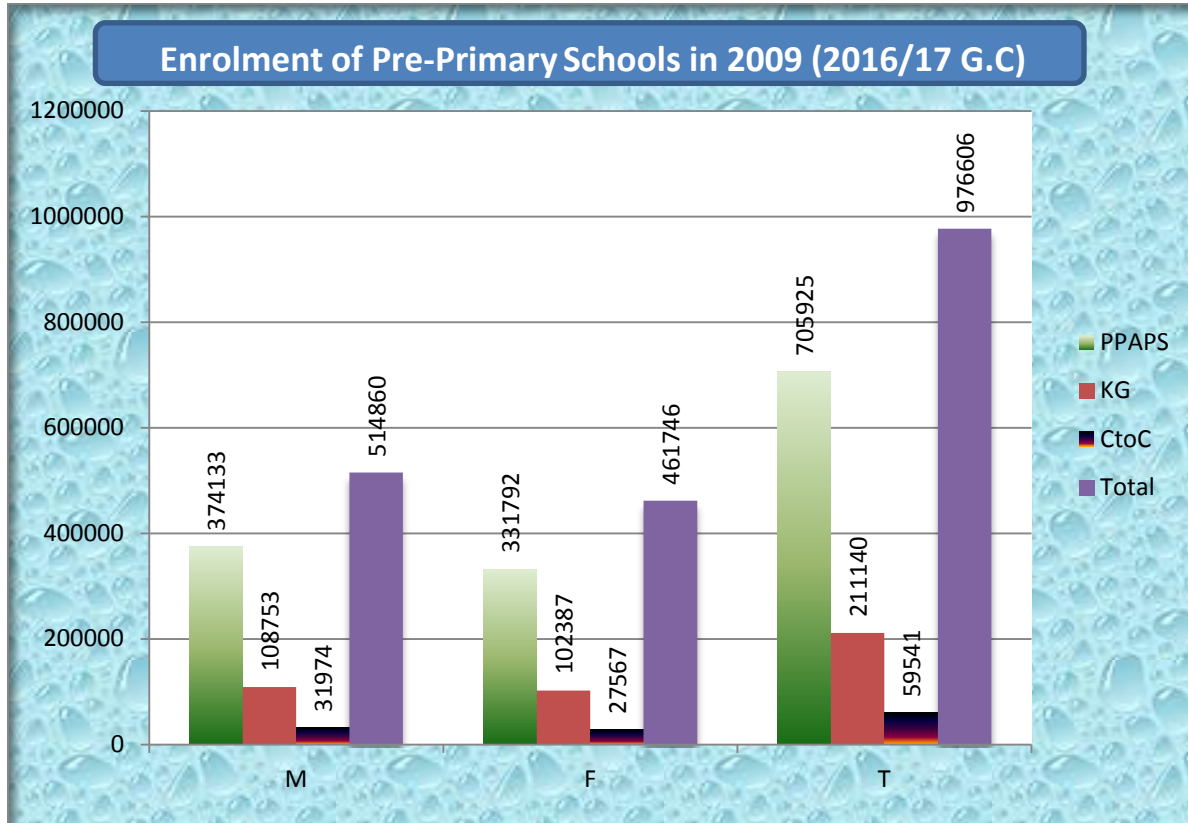

MAP 1: KINDERGARTEN SCHOOLS LOCATION MAP AT REGIONAL LEVEL

Map 1 above shows the distribution of KGs those their location data have collected. As can be seen on the map most of KGs in the Region are located in urban areas and along the main roads. As we can observe from the distribution map; all zones and administrative towns in general and Zones like Borena, Bale, Guji, Horo Guduru Wollega and both Hararge zones need due attention in increasing access of kindergarten schools in all unreached woredas.

1.1.3. Enrolment in Pre-Primary Education

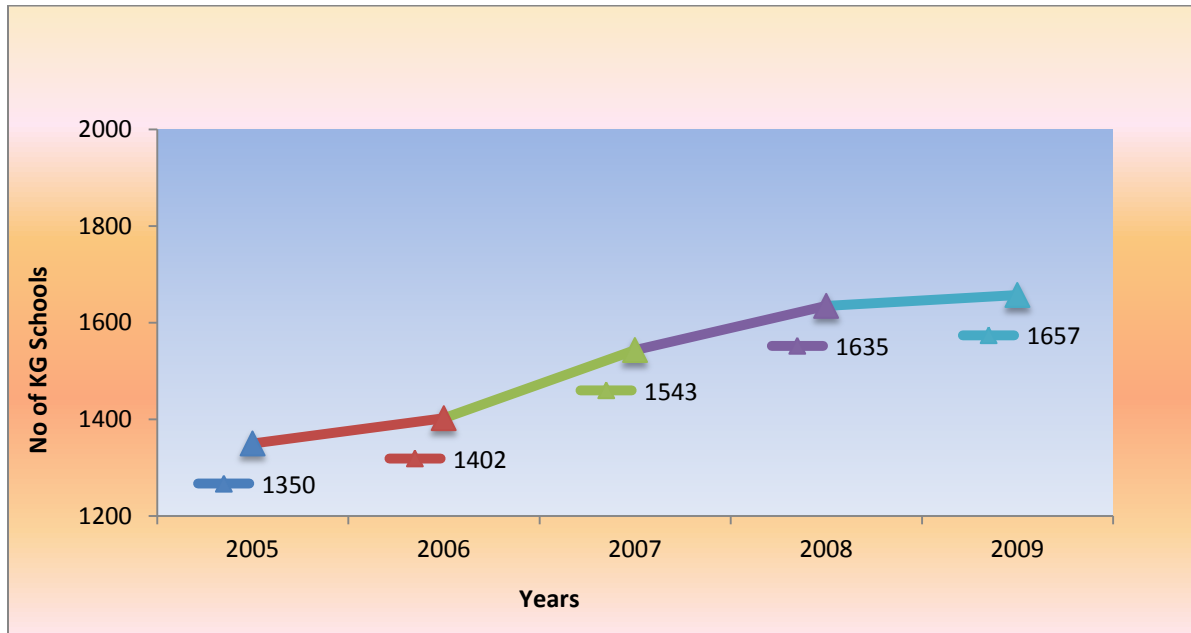

Graph 2 below shows that the total number of enrolment in per-primary education is 976,606 with a slight gender imbalance of 52.7% in favor of boys. Of these, PPAPS enrolment had the largest share of students 705,925 (47% female) followed by KG which had 211,140 (48.5% female) whereas C to C had the last share 59,541 (46.29% female).

GRAPH. 1.2: ENROLMENT OF PRE-PRIMARY SCHOOLS

Graph 3 and 4, below shows that, the number of KGs increased from 1,350 in 2005 E.C to 1,657 in 2009 E.C and enrolment in KGs has increased from 146,531 in 2005 E.C to 211,140 in 2009 E.C. Pre-primary enrolment needs to be move forward faster to improve the low GER of the sector, in comparison to the high number of pre-primary school age children. As the data of SAP of preprimary children indicates most of children are still out of preprimary schools. Policies and strategies need to be implemented with the Growth and Transformation Plan of Education sector, to achieve the desired fast growth.

GRAPH. 1.3: TREND OF NUMBER OF KINDERGARTENS

GRAPH. 1.4: TREND OF ENROLMENT OF KINDERGARTENS

1.1.4. Gross Enrolment Rates in Pre-primary Education

GER of pre-primary education is defined as the percentage of total number of children in the level out of the total population of 4-6 age, irrespective of age groups in the region or in a given zones.

As shown from graph 5 and Table 1.2 below, the Gross Enrolment Rate (GER) for Kindergarten (KG), Pre-Primary Attached to Primary Schools (PPAPS) and Child to Child program in 2009 is 32.05% (M= 33.5% F= 30.6%). When we consider only KGs the figure falls drastically to 6.9%. The gender parity index /GPI/ of the year is 0.91, which shows that there are more boys than girls in the system.

GRAPH. 1.5: ZONAL AND ADMINISTRATIVE TOWNS COMPARISON OF PREPRIMARY GER

As indicated on Graph 5 above, when GER and GPI of the zones and Administrative towns compared to the regional average, GER of 6 zones and all Administrative towns is greater than the regional average, 32%, whereas, regarding to the gender equity 2 Zones and 1 Administrative town have GPI equal to regional average, 0.91. But 15 administrative towns and 11 zones have GPI greater than the regional aggregate.

1.1.5. Teachers in Pre-primary Schools

In pre-primary education almost, all teachers those care for the children in PPAPS are from Primary first cycle schools to work side by side. Child to child program is held by trained young facilitators under full supervision of neighboring primary school. Only Kindergarten Schools have their own teachers. In table 1.3 below it is possible to see that there was a total of 6,209 teachers registered in Kindergarten schools with 71.2% of female teachers

1.1.6. Quality Indicators in Pre-Primary Education

Although education quality cannot be indicated with only quality indicators in this subsector listed below; Pupil Teacher Ratio (PTR) and Pupil section Ratio (PSR) are the commonly used indicators. Efficiency indicators provide a picture on the learning/teaching process; classroom environment in terms of overcrowding, pupil–teacher contact, and availability of learning/teaching materials. For all these indicators, a lower value leads to reduced levels of overcrowding or reduced competition for classroom resources and implies better learning conditions.

1.1.6.1. Pupil Teacher Ratio (PTR)

PTR gives an indication of contact between pupils and teachers in a classroom. If it is lower, then there is high chance of contact between a teacher and pupils and teachers will have enough time to take care of children and check homework and class work as well. In other words, the lower the PTR the better teaching learning process would be. As shown in table 1.3 above the Pupil Teacher Ratio (PTR) of KG in the academic year reached 34:1. Administrative towns have better Pupil Teacher Ratio (PTR) of KG, 32:1 than Zones which is 48:1 at average.

1.1.6.2. Pupil Section Ratio (PSR)

As shown in table 1.3 above; the regional average Pupil Section Ratio (PSR) of KG in the academic year reaches 39:1 in general. The same to Pupil Teacher Ratio (PTR), Administrative towns have better Pupil Section Ratio (PSR) of KG, 38:1 than Zones which is 40:1.

2. Primary Education

In Ethiopia, primary education is defined as education in Grades 1-8 in two cycles 1st cycle, (grades 1-4) and 2nd cycle (grades 5-8). The program is normally designed on a unit or project based on basic education to develop pupils' ability to obtain and use information they need, about their home, environment/community or the country.

2.1. Primary Schools Information

2.1.1 Number of Primary Schools by Ownership, Cycle & Number of CRCs

According to the 2016/17G.C. regional EMIS database there were 14,309 primary schools in the Region, of which all responded to ASC. This number shows an increment of 3.29% when compared to 13,853 primary schools in 2015/16 G.C. As shown in Graph 2.1 below among 14,309 primary schools 13,335 (93.19%) were government owned whereas the rest 974 (6.81%) were owned by non-government. On the other hand, table 2.1 shows, these primary schools in each Zones and Administrative towns by cycle. Accordingly; out of 14,309 primary schools 3961 are first cycle primary (grade 1-4) and 10,348 are second cycle primary (grade 5-8).

2.1.2. Geographical Locations of Primary First Cycle (Grade 1-4) Schools in the Region

PRIMARY FIRST CYCLE GEOGRAPHICAL LOCATIONS

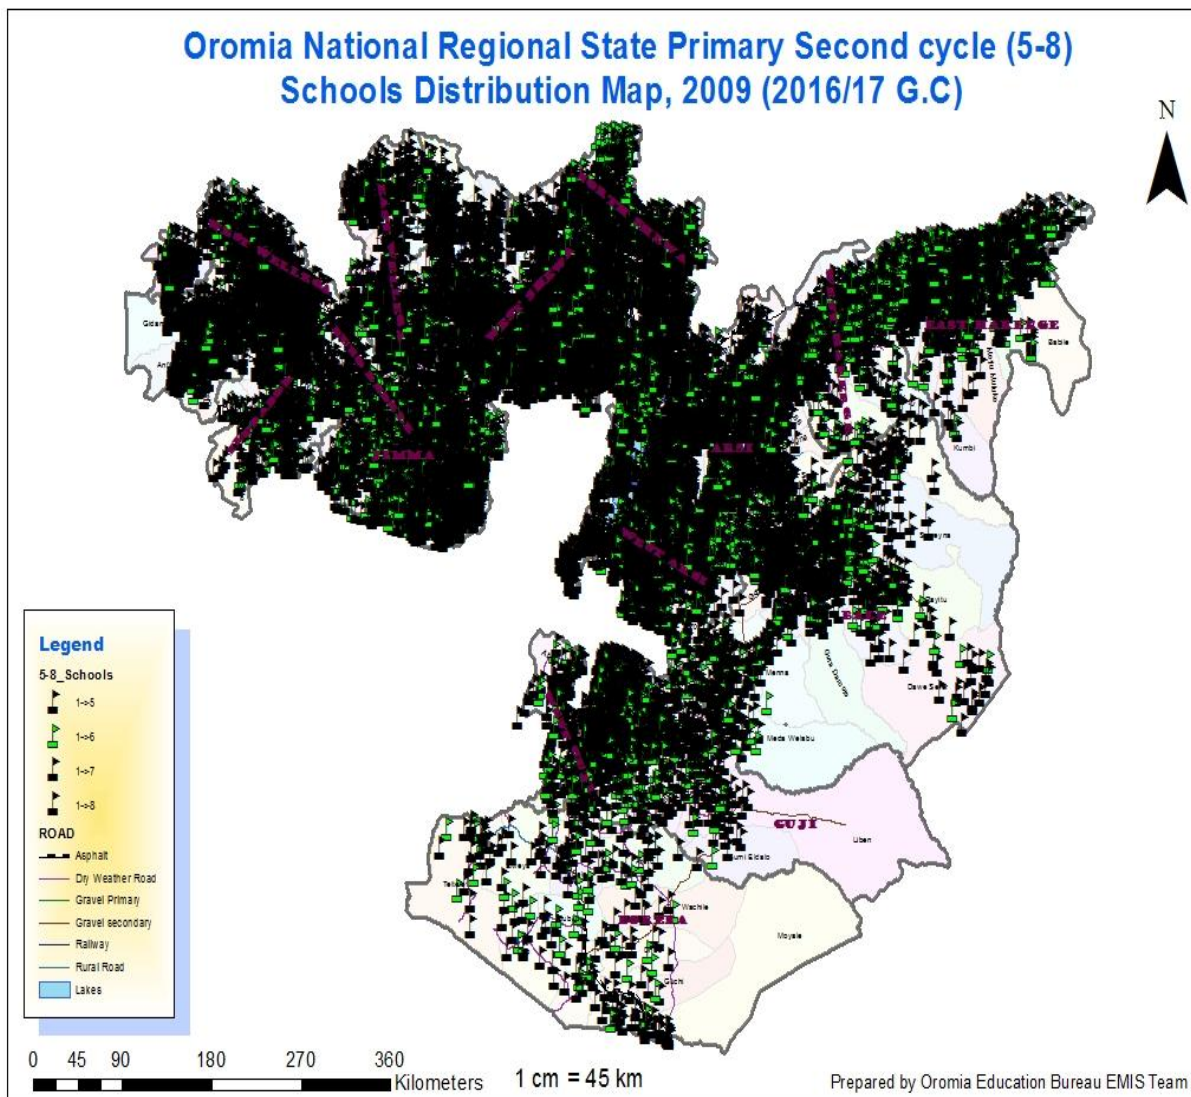

Map 2 above, shows the distribution of primary 1st cycle schools in the Region. As we can see from the map primary first cycle schools are very dense in Northern and central parts of the region, whereas scattered in the south and almost no schools at all in south East areas, because most of these areas are served for grazing purposes for pastoral society or it is covered by forest.

As the map indicates, most of pastoral areas are still unreached to primary 1st cycle within 3 km buffer zone; in order to achieve government policy “every child has not to move more than 3 km from his/her home for schooling.” So, support and attention of government is needed to access those pastoral areas for schooling.

2.1.3. Geographical Locations of Primary Second Cycle (Grade 5-8) schools

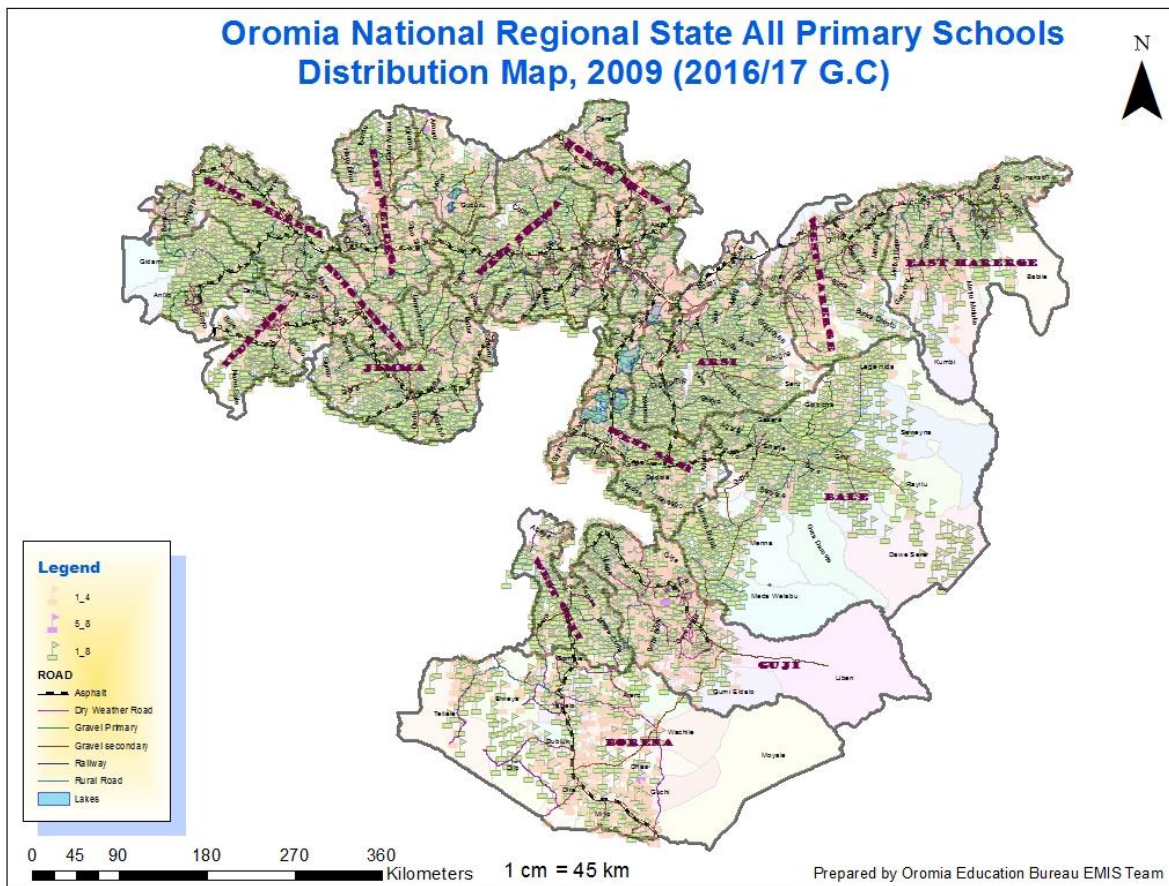

PRIMARY SECOND CYCLE GEOGRAPHICAL LOCATIONS

Map 3 above shows the distribution of primary 2nd cycle schools in the Region. As we can see from the map the schools are dense in central and North East & west areas of the region, whereas scattered in similar areas as indicated for primary 1st cycle. The point data on the map shows schools by grade level with different color for (Grade 1-5, Grade 1-6, Grade 1-7, Grade 5-8 and Grade 1-8), and the map also shows the accessibility of road to the schools.

2.1.4. Geographical Locations of All Primary (Grade 1-8) Schools

PRIMARY SCHOOLS (GRADE 1-8) GEOGRAPHICAL LOCATIONS

Map 4, shows the distribution of all primary schools in the Region, it means those schools having grade level (1-8). As we can see from the map the schools are highly dense at central, North East and North West areas of the region, whereas scattered in Southern part of the region. The non-schools areas are grazing land or forest.

The map also shows the accessibility of major roads to the schools. As the map indicates, most of pastoral areas are still unreached of primary schools within 3 km buffer zone, so that it needs special attention from concerned bodies.

2.2. Primary Enrolment and Enrolment Rates

2.2.1. Intake Rates

Intake rate is used to indicate the extent of new entrants to the first grade of primary education. It indicates the proportion of children who join the primary education system for the first time in terms of official school age for the first grade. It compares children who come to school for the

first time, registered at first grade (grade 1) with children of official school admission age (7 years old children). Under this umbrella Apparent Intake Rate (AIR), Net Intake Rate (NIR), Early Starters and Late Starters are analyzed.

2.2.1.1 Apparent Intake Rate (AIR)

AIR is the percentage of new entrants (irrespective of age) in Grade 1, out of the number of children of the official primary admission age 7, in a given year. Sometimes, it is also called the Gross Intake Rate (GIR). AIR tends to reflect those students, who may have not been enrolled in school at the appropriate age, and often reflects the “backlog” of students who could not enrolled before. A high Apparent Intake Rate indicates a high degree of access to the first grade of primary education. The calculation includes all new entrants to first grade (regardless of age). The Apparent Intake Rate can be more than 100%, due to over- and under-aged children entering primary school for the first time and/or due to inconsistencies in population data. Here is the formula to calculate AIR.

$$AIR = \frac{\text{Number of New Entrants in first Grade}}{\text{Population at the official school - entrance age}} \times 100$$

GRAPH 2.2. TREND OF AIR IN THE LAST FIVE YEARS

Although the known Ethiopian government school entrance age is 7 years old for grade 1, children older than the official age are registered to attain grade 1 and made Apparent Intake Rate over 100% as can be seen from table 2.6 above.

As shown on graph 2.2 above, AIR of the Region was greater than 100% for the last five years; which was because of over and under age children enrolment. The AIR has been fluctuating from year to year. As the data shows, there are children in the system which have not been enrolled in schools until this year, and often reflects the “backlog” of children who could not be enrolled before.

As indicated in table 2.6 above, it is possible to see that, AIR of Oromia in 2009 E.C (2016/17 G.C) is 169.5% (M=179.4% and F=159.5%). The table also shows that all zones and administrative towns have AIR greater than 100%. Concerning GPI eight zones and one administrative town (Bale, West Gujii, Guji, South West Shoa, West Shoa, East Wollega, Kellem Wollega, North Shoa & Batu Administrative Town,) have GPI less than that of the regional average (0.89). The rest Zones and Administrative towns have GPI greater than the regional average.

Total Oromia		6482	6080	12562	584975	519176	1104151	289170	243626	532796	880627	768882	1649509

From the table 2.7 above, it is possible to see that a total sum of 1,649,509 new entrants have joined grade 1, where 880,627 are Male and 768,882 are female. The largest number of new

entrants (66.9%) was 7 years old which is the official government recognized age of primary school entry. The data shows that 0.8% of the new entrants were underage whereas 32.3% of the new entrants were overage. (See the above table for more information)

2.2.1.2. Net Intake Rate (NIR)

Net Intake Rate shows new entrants in the first grade of education system who are of the official school-entrance age, expressed as a percentage of the population of the same age. The calculation requires new entrants in the first grade of education cycle which are the official school-entrance age and population at the official school-entrance age. The method of calculation is as follows:

$$(NIR) = \frac{\text{New entrants in the first grade of Primary 1st cycle who are of the official school - entrance age}}{\text{Population at the official school - entrance age}} \times 100$$

A high Net Intake Rate for primary education of official primary school-entrance age children indicate a high degree of access for official school entrance age to the first grade of primary education.

As can be seen on graph 2.3 above, the trend of NIR in last five years has been fluctuating up and down at regional level. The graph also shows that NIR of Grade 1 by 2011/12 G.C was, 91.0% (M=94.2%, F= 87.8%) and then this rate has moved up to 113.5% (M=119.1%, F= 107.7%) by 2016/17 G.C.

Table 2.8 above also shows that the NIR of 2016/17 G.C by Zones and Administrative towns. Among all zones & towns, 5 Zones (Borena, OSZS Finfine, East Shoa, Ilu Aba Bora, West Wollega, West Shoa) and Mojo from Administrative towns have NIR less than 100%. All the rest zones and administrative towns have higher NIR than expected.

2.2.2. Gross Enrolment Rate (GER)

Gross Enrolment Rate is defined as the enrolment in a specific level of education, regardless of age expressed as a percentage of the official school-age population corresponding to the same level of education in a given school year. GER is a crude measure of education coverage. Since it includes under-aged and over-aged pupils, GER can be greater than 100%, and frequently in countries to attempt in addressing the backlog of students attending the school because of different reasons, such as financial need, family issues, or lack of schools.

The data required to calculate GER is, the enrolment in a specific level of education, regardless of age and official school-age population corresponding to the same level of education. The method of calculation is as follows:

$$(GER) = \frac{\text{Total enrolment in a specific level of education, regardless of age}}{\text{official school - age population corresponding to the same level of education}} \times 100$$

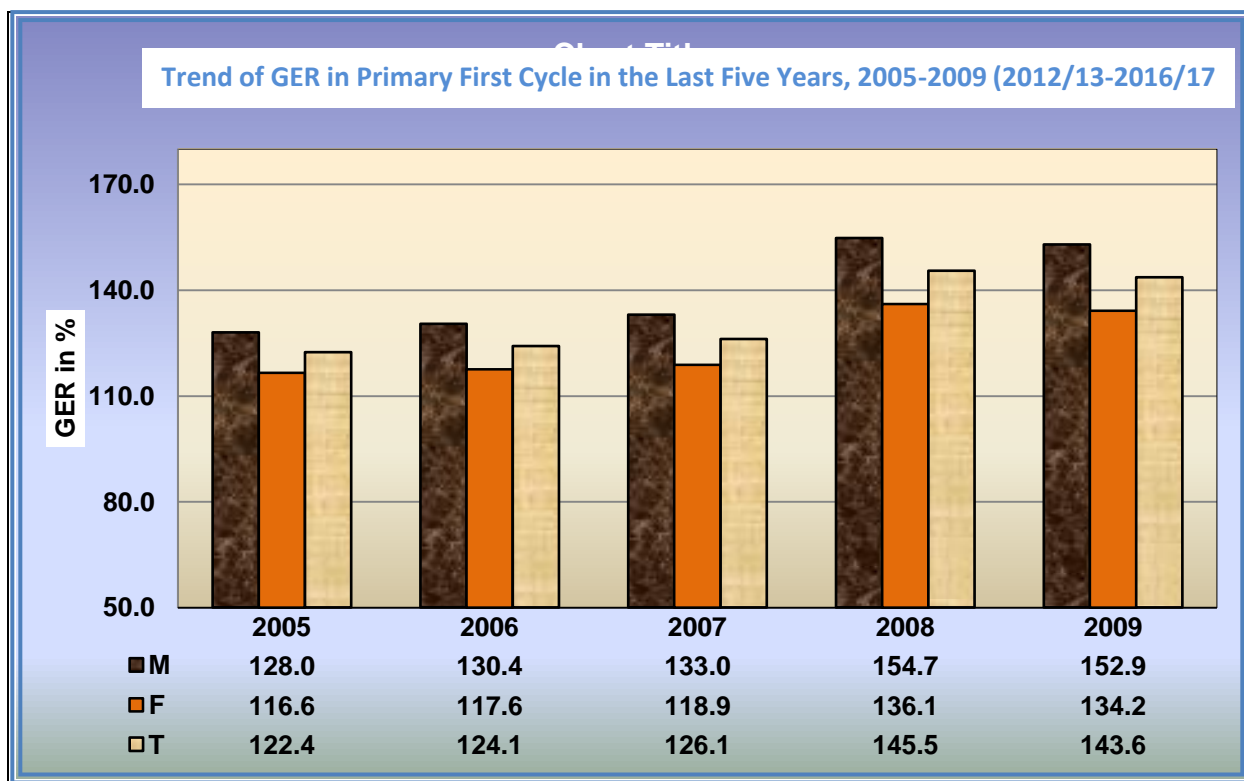

GER does not appear to be a good indicator of school coverage. Although early or late entry is a minor issue (that all children attend school is most important). Consequently, the GER is often considered as an indicator of the system's physical capacity rather than one of school coverage.

A GER of 100% would not imply that all children attending school due to different reasons yet the schools have the capacity to educate all children of school age.

2.2.2.1. Gross Enrolment Rate of Primary First Cycle /1-4/

Gross Enrolment Rate of first cycle primary is the rate calculated simply by dividing the number of students enrolled in first cycle primary (irrespective of their age) to the population of 7-10 years old. The Gross Enrolment Rate (GER) of Primary First Cycle /1-4/ schools of the current year is 143.6% (152.9% for boys and 134.2% for girls). This implies that there is an existence of overage and underage pupils enrolled in primary first cycle schools.

GRAPH 2.4. TREND OF GER IN PRIMARY FIRST CYCLE IN THE LAST FIVE YEARS

Graph 2.4 above shows, by 2005 (2012/13 G.C) the first cycle primary GER of the region was 122.4% (M=128.0%, F= 116.6%) and increased to 143.6% (152.9% for boys and 134.2% for girls) by 2009 (2016/17 G.C).

It is clearly seen from table 2.9 below, that the number of over age and under age children in the system has not decreased yet. As the data shows, fifteen zones and two administrative towns have GER of primary first cycle below the regional average 143.6%. While the rest zones and administrative towns have above the regional average.

Concerning the GPI, eight zones and two Administrative Towns, (Batu & Robe) have GPI less than the regional average which is 0.88. The rest zones and Administrative Towns have GPI equal to or greater than the regional average. Among 18 Administrative Towns 11 of them have GPI greater than or equal to one that implies girls have got equal or more access to the first cycle education as compared to boys in those Towns.

The other method in analyzing gender issue is comparing the gender gap of the level. Accordingly, gender gap is expected to be zero, which indicates whether both sexes have got equal chance to join school equally or not. Negative gender gap indicates female participation is greater than that of male and positive gender gap indicates male participation is greater than that of female. As illustrated in the same table, among all zones and Admin Towns, no town or zone have GG equal to 0, except Adama Admin Town having 0.3. Six zones and two Admin Towns of the region have gender gap greater than the regional average which is 18.8%. Gujii, West Guji and Bale Zones have the highest GG (45.6, 44.8 and 35.6) favoring to male whereas Dukem, Lega T/ L/ Dadhi and Sululta Admin towns have the highest GG (-76.8, -64.9 and -31.9) favoring to female respectively.

2.2.2.2. Gross Enrolment Rate of Primary Second Cycle /5-8/

Gross Enrolment Rate of primary second cycle (5-8) is the rate calculated simply by dividing the total- number of students enrolled in second cycle primary (irrespective of their age) to the total population of 11-14 years old.

GRAPH 2.5. TREND OF PRIMARY SECOND CYCLE (5-8) GER IN THE LAST FIVE YEARS

As shown on graph 2.5 above, the Gross Enrolment Rate of primary second cycle (5-8) shows increasing during the last five years. It was 57.2% (M= 60.2%, F= 54.1%), in the year 2005 (2012/13 G.C). After fluctuating up and down, it was increase to 63.9% (M=68.9%, F= 58.9%) by the year 2009 (2016/17G.C), as the data indicates the participation of students in primary second cycle needs serious attention by concerned bodies.

Table 2.10 above shows the GER of second cycle primary education of the region by Zones and Administrative towns. Accordingly, the GER of second cycle primary of 8 zones and all the 18 administrative towns exceed the regional average which is 63.9% (M=68.9%, F=58.9%).Whereas, the rest twelve zones have registered less than the regional average. Borena Zone is the least of all with 32.7%GER.

Regarding to GPI,8zones (West Guji, Guji, West Hararge, East Hararge, Bale, Kellem Wollega, Ilu Aba Bora, and West Wollega) and 2 Administrative Towns (Batu and Woliso) have registered GIP less than the regional average which is 0.85. The rest Zones and administrative towns have GPI greater than or equal to the regional average. On the other hand only one zone Borena which has least GER, and 5 administrative towns have GPI greater than or equal to one (1.0).

2.2.2.3. Gross Enrolment Rate /GER/ Primary (1-8)

Gross Enrollment Rate of primary education (1-8) is a crude measure of primary educational coverage, which indicates the percentage of total enrollment in primary schools irrespective of age out of the corresponding primary school age (7-14) population. Apparently, it includes under-aged and over aged pupils. GER can be higher than 100%.

GRAPH 2.6. TREND PRIMARY 1-8 GER IN THE LAST FIVE YEARS

Trend of GER for primary education in the region has shown slight increment for the last four years and dropped to 104.4% in 2016/17. As can be seen from graph 2.6 above, in general it has been increasing from 92.1% (M=96.5%, F=87.5%) in 2012/13 to 104.4% (M=111.5%, F=97.1%) by 2016/17. As the data shows, insignificant change was observed in the past five years due to unknown reasons. Apparently, since it is difficult to list those reason here, it is better to conduct research to find the possible solution for the problems.

Table 2.11 above illustrates Primary education GER of the region by zone and Administrative towns. Accordingly, fifteen zones and one administrative town in the region have GER below the regional average 104.4% in the year 2009. To the contrary, the rest of zones and administrative towns have above the regional average. Regarding GPI, seven zones and one administrative town have registered GPI less than the regional average which is 0.87; while others have GPI above or equal to the region average. Among them only seven Administrative towns have GPI greater than or equal to 1.0, which means female children have gotten equal or more access to primary education than Male.

2.2.3. Net Enrolment Rate (NER)

It is the rate of the official age group enrolled for a given level of education expressed as a percentage of the corresponding school age population. NER is the better way of measuring organized timely school participation and is a more refined indicator of school and enrolment coverage in terms of explaining the proportion of pupils enrolled from the official age group. NER is usually lower than the GER since it excludes over-aged and under-aged pupils. NER is calculated by dividing the number of proper age for primary education (for Ethiopia ages 7-14) by the number of children of school age (7-14) population.

$$NER = \frac{\text{Total Enrolment in a specific level of Education with official age - group}}{\text{Official school age population corresponding to the some level of Education}} \times 100$$

A high NER denotes a high degree of participation of the official school-age population. The theoretical maximum value of NER is 100%. Increasing trends can be considered as reflecting improvement in participation of official school age population at the specified level of education. When NER compared with GER, the difference between the two ratios highlights the incidence of under-aged and over-aged enrolment. If the NER is below 100% then the difference with 100% provides a measure of the proportion of children not enrolled at the specified level of education. However, some of these children might be enrolled at other levels of education.

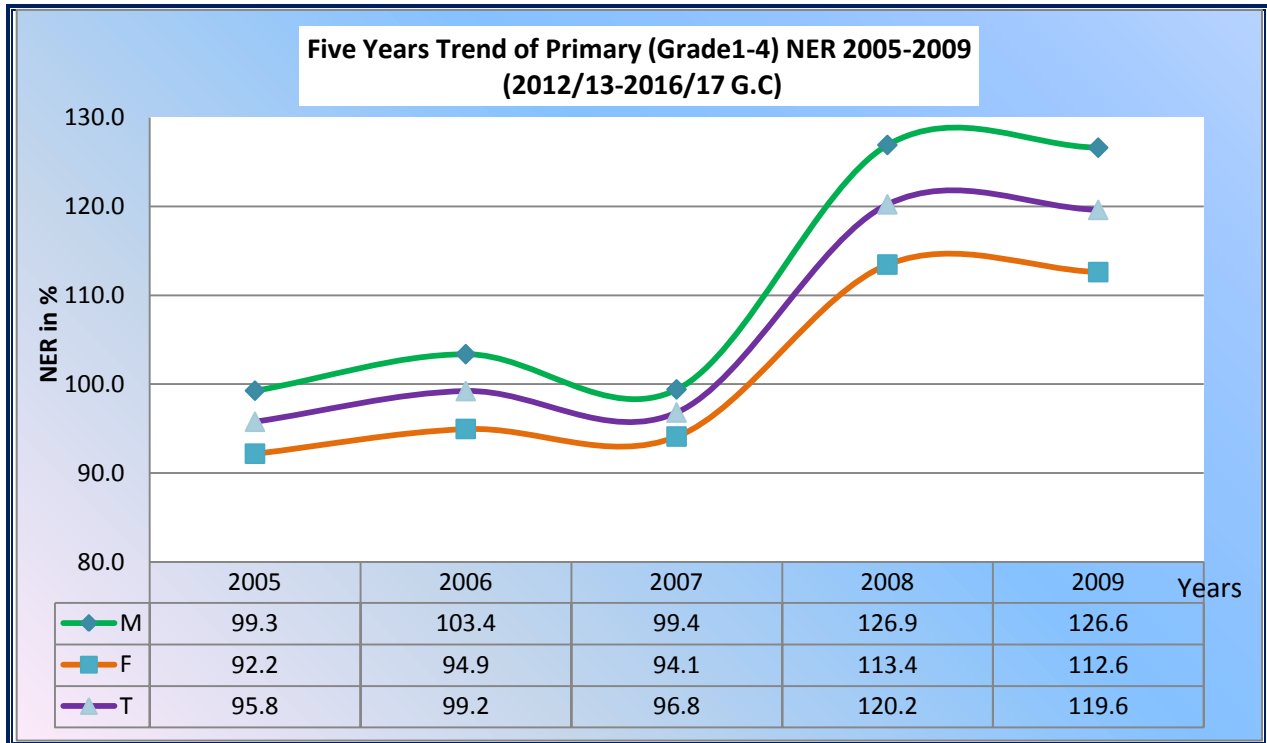

The NER is measure of school coverage for theoretical age groups, but is unfortunately not well to adapting measuring overall coverage. Its main drawback is to exclude late entrants, early starters and repeaters. Furthermore, the NER is severely affected by the inaccuracy of single-age data. Children's reported ages as per school censuses are often wrong due to children's or their

teachers’ ignorance, particularly when the registration of births is not widespread, or due to amendments to the birth register.

2.2.3.1 Net Enrolment Rate (NER) in Primary First Cycle (1-4)

It is the percentage of students who enrolled in primary first cycle, whose age is 7-10, compared to the school age population of this level; that is total population of 7-10 years old.

GRAPH 2.7. FIVE YEARS TREND OF PRIMARY FIRST CYCLE NER

Graph 2.7 above shows, the trend of last five years NER of first cycle primary at regional level. Accordingly, the NER of primary in first cycle was 95.8% (M=99.3%, F=92.2%) in 2005 and the rate goes up and down for the last 5 years, and finally reaches to 119.6% (M=126.6%, F=112.6%) by 2009.

Thus, we need to refine and assess the root cause of data inflation (i.e NER <= 100%) for it goes beyond the optimum rate in 2008 and 2009 E.C.

TABLE 2.12. PRIMARY FIRST CYCLE NER

Table 2.12 above demonstrates the regional NER of first cycle primary by zone and Administrative towns that the aggregate NER of first cycle primary is 119.6% (M=126.6%, F=112.6%).Accordingly, four zones (Borena, OSZS Finfinne, East Shoa,WestArsi) and one Administrative town (Modjo) have NER less than the ideal value which is 100%. Regarding GPI, only seven zones have less than the regional average GPI (0.89). The rest 17 zones and all Administrative towns have GPI greater or equal to the regional average, among them ten administrative towns have registered GPI greater than or equal to 1.0

2.2.3.2. Net Enrolment Rate (NER) in Primary Second Cycle (5-8)

NER at primary second cycle is the proportion of enrolment of students in second cycle primary of the age (11-14), with eligible school population of age (11-14).

GRAPH 2.8: FIVE YEARS TREND OF PRIMARY 5-8 NER

As graph 2.8 indicates, the trend of the NER of primary second cycle education in the region, a little bit progress is observed for the last four years. Accordingly, in 2012/13 it was 43.7% (M=44.9%, F=42.4%) and then by showing a bit increment it rose to 51.8% (M=54.8, F=48.7%) by 2009, with the average annual growth rate of 3.47%.As the growth rate indicates, NER of the level shows insufficient increment. So that, it is recommended that a serious attention should be given by concerned bodies for the issue to resolve.

Table 2.13 above shows NER of second cycle primary education of the region by zones and Administrative towns. Accordingly, eleven zones have registered NER of second cycle primary less than the regional average, 51.8% (M=54.8, F=48.7%). But nine zones and all Administrative towns have registered NER greater than the regional average. Regarding to GPI, nine zones and two administrative towns have GPI less than the regional average (0.89). The rest eleven zones and 16 administrative towns have GPI greater or equal to the regional average, among them three zones (Borena, East Shoa& Jima) as well as seven administrative towns have registered GPI greater than or equal to 1.0

2.2.3.3. Net Enrolment Rate (NER) in Complete Primary (1-8)

The Net Enrolment Rate (NER) for complete primary can also be calculated in a similar way of calculating NER for first cycle and second cycle primary. It is the proportion of the appropriate school age (7-14) children enrolled in primary school with the total school age (7-14) population. When the first and second cycle NER separately compared with complete primary in the region, it would take more time to achieve 100%. This is because those children in first cycle primary of age 11-14 who are over aged for first cycle, and students of age 7-10 who are under aged for the second cycle are included while calculating NER for complete primary.

As illustrated on the graph 2.9 above; in between the years 2005 to 2007, NER of complete primary education shows steady increment and boomed to 98.2 in 2008 and slightly decrease to 97.5% in 2009.

Table 2.14 above also shows complete primary education NER of the region by Zone and Administrative Towns. Accordingly, among all zones of the region, NER of twelve zones' and two administrative town' NER less than the regional average of primary education NER, 97.5% (M=103.5%, F=91.4%). On the other hand eight zones and sixteen administrative towns have NER above the regional average. Furthermore, among all zones and Administrative towns only six zones have GPI below the regional average (0.88). The remaining have GPI above the regional average, eight administrative towns have registered GPI greater than or equal to 1.00 which means equal or more accessible for female students.

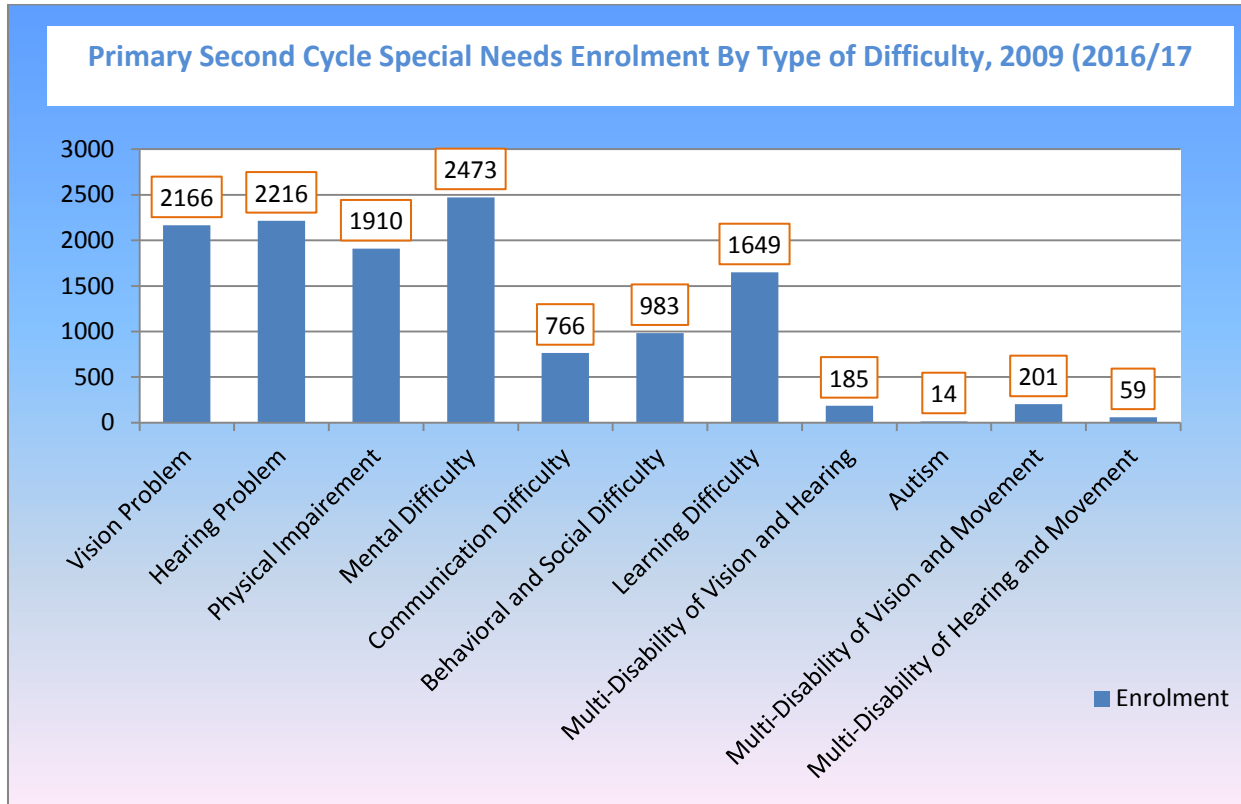

2.2.4. Enrolment of Children with Special Needs

In the process of collecting educational data the issue of Special needs data has also addressed. Graphs 2.10, 2.11 & 2.12, below illustrate enrolment with Special Needs by type of disability in primary first and second cycle. In 2009 (2016/17 G.C) 50,223 (Male 28,552, Female 21,671) Special Needs students have registered at regional level. Amongst, 5,592 (11.13%) have partial and sever physical difficulty, 11,913 (23.72%) have partial and sever vision difficulty, 7,788 (15.51%) have partial and sever hearing difficulty and 9,973 (19.86%) have partial and severe mental difficulty and other type of disabilities such as multi disabilities, autism, communication difficulties, learning difficulties, behavioral and social difficulties incorporate 29.78%. This data indicates that, there are a lot of children with Special Needs who are currently not attending schools throughout the region as comparing to 10% of school age population of their level. The existence of such large number of students with special needs in the region requires designing and implementing the already existing inclusive policy and strategy in order to provide them the support of teachers training, physical infrastructure, provision of learning equipment and preparing special schools where it is needed. Therefore, the issue needs our attention to make them getting opportunity to learn in an inclusive environment and keeping their right to learn. Table 2.15 below also shows Special Needs enrolment by Zone as well as Administrative towns by type of disability.

Comparison of Primary Education Special Need Enrolment by Zone

As shown in Graph 2.13 below, a regional analysis on children with special needs in primary schools shows that East Hararge, West Shoa and Arsi have the largest share of SNE pupils which is more than 39.7%. While Ilu Aba Bora, Modjo, Dukem, L/T/L/Dadhi Administrative Town shave the lowest share, 0.1%, of the share of the Region

2.2.5. Orphans in Primary Schools

2.2.5.1. Proportion of Orphans in the Region

Orphan students are those who have lost both parents (mother and father) due to different reasons. The total number of orphans in the primary education is determined and expressed as a proportion to the total enrolment as indicated in table 2.18 below. Findings from the table indicate 52,898 (29,560 boys and 23,338 girls) have lost both of their parent that share 0.68% of the entire pupil enrolment in primary schools, with the proportion of boys 0.71% and Girls 0.65%. A regional analysis indicated that Gelan and Sululta towns had the highest proportion of orphans which is 3.68%, 2.59% respectively, compared to all other Zones, where as Shashemenne and Assella Administrative town have the lowest proportion of orphan pupils rating 0.26%, 0.40% when we compare with their respective zone or administrative enrolment respectively.

2.3. Primary Enrolment

2.3.1. New Entrants in primary Education

I. New Entrants by Age

The Annual School Census 2009 E.C also incorporates new entrants in Primary schools by age. The government recognized the official school beginning age as 7 year and it’s upon this that the findings in the figure below are summarized.

GRAPH 2.14. NEW ENTRANT ENROLMENT BY AGE

From graph 2.14 above, it is possible to observe that a total of 1,649,509 new entrants (12,562 less than 7 years, 1,104,151 7 years and 532,796 above 7 years old children) have been registered in 2009 E.C. This figure represents a proportion of 91.14% (91.04% Males and 91.25% Females) from the total grade 1 enrolment. When compared by age, the biggest number of new entrants (66.94%) is 7 years which is the official government recognized age of primary school entry. Results show that 0.76% of the entrants were underage whereas 32.30% of the new entrants were overage.

II. New Entrants by Zone and Administrative Towns

As the table 2.20 below indicates, in the region have brought 91.1% (M=91.0% and F=91.3%) of new entrants to grade one. West Shoa, South West Shoa and Ambo Administration towns having lowest percentage of new entrants to grade one which are 80.3% 78.7% and 77.5% respectively. Whereas Bale zone, Modjo as well as Asella administrative towns have brought the highest percentage of new entrants to grade one by having 97.7%, 97.7 and 96.6% respectively.

2.3.2. Grade 1-8 Enrolment

I. Primary Enrolment by Grade, Ownership and Gender

Enrolment was captured by Grade, ownership and gender to establish their percentage distribution for better planning and allocation of school facilities as well as soliciting for support from various stakeholders. Findings indicate that a total regular enrolment of 7,729,533 (Male 4,157,478 and Female 3,572,055) pupils have made in 2009 (2016/17) with 96.7% (96.9% Male and 96.5% Female) belonging to government schools, whereas, 3.3% (3.1% Male and 3.5% Female) belonged to Non-Government schools. Considering pupil enrolment distribution by grade, higher enrolment figures were registered in lower classes and gradually decreases as the grade goes up. In general the percentage distribution of pupils by class was seen below in graph 2.15.

GRAPH 2.15. PERCENTAGE OF DISTRIBUTION OF PRIMARY EDUCATION ENROLMENT BY GRADE

Results from graph 2.15 above shows that there is a high dropout rate and repetition rate when we move from Grade one to Grade eight in the system.

II. Primary Enrolment by Zones

Enrolment was categorized according to Zones to establish which zones have the highest and/or lowest enrolment figures. These figures are used for planning and allocation of resources by the government, the figure below summarizes the findings. As figure clearly indicates Zones in the Region had highest percentage share of enrolment in all primary schools which is 95.7% whereas Administration towns had the least share of only 4.3%.

GRAPH 2.16 . ZONAL COMPARISON OF GOVERNMENT SCHOOLS PRIMARY ENROLMENT

2.4. Primary Gender Equity in the Last Five Years

I. What is Equity?

Education is considered to be one of the best channels to reduce socioeconomic inequalities, and especially, a powerful tool to reduce their trans-generational transmission. The level of qualifications and degrees obtained throughout schooling determine an individual's future socioeconomic status to a certain extent. Education systems are therefore expected to offer each child similar chances of success, based on merit over and above personal characteristics beyond their control (gender, area of residence, and so on). Given that schooling options are likely to be affected by individuals' financing ability and other specific characteristics, it is important to determine the extent to which education systems, especially those that are publicly funded, take these factors into account to limit their impact on individuals' access to school and results.

II. The Absolute Gap in Performance between Two Groups

The absolute gap in the performance of two groups A and B (such as urban and rural indicators or boys and girls) is calculated by subtracting the chosen performance indicator for group A from that for group B. The absolute gap is interpreted as the amount by which it is necessary to increase the performance indicator for group B (rural or girls in this instance) to achieve equity between the two groups.

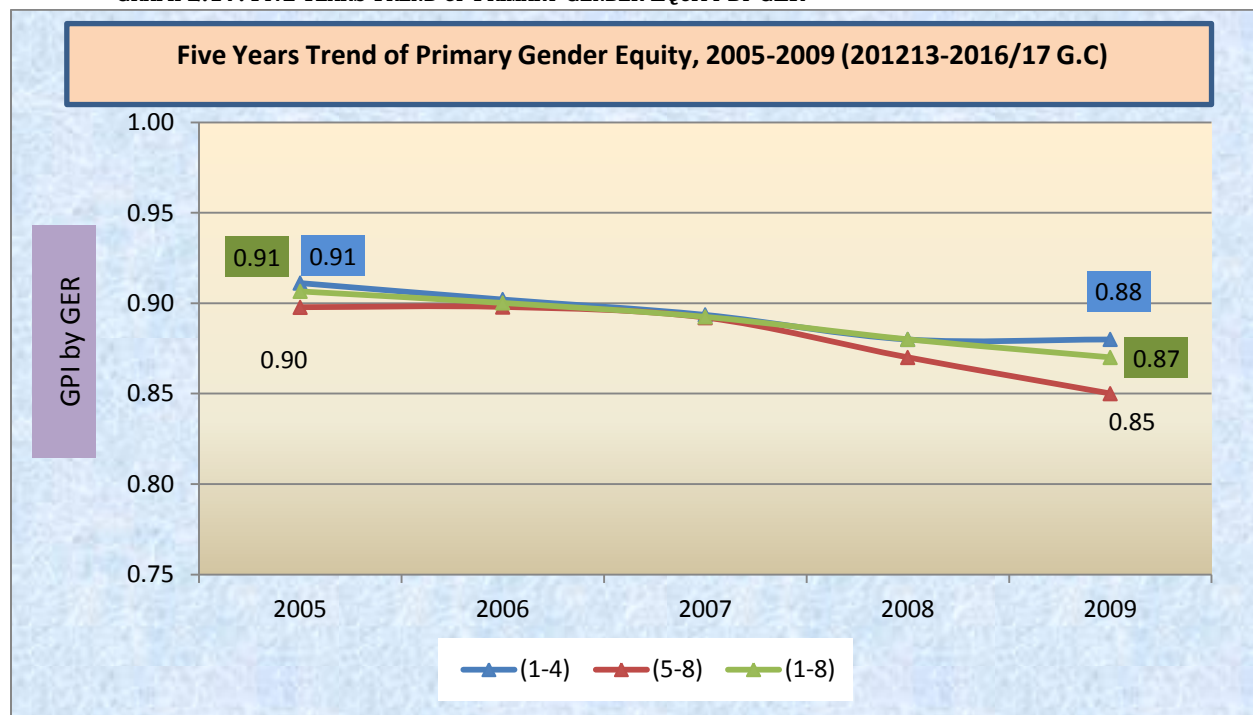

III. The Parity Index

The parity index comparing groups A and B is obtained by dividing the performance indicator of group B by that of group A. The parity index provides the factor by which it would be necessary to multiply the group B indicator (or divide the group A indicator) to achieve an equal value for both groups. Parity between the two groups is achieved when the parity index is equal to 1. An index value above 1 indicates an advantage for group A (numerator); conversely, an index value below 1 indicates a disadvantage for group B. The greater the divergence of the index from the value of 1, the greater the disparity between the two groups.

TABLE 2.31. FIVE YEARS TREND OF PRIMARY GENDER EQUITY BY GER

Five Years Trend of Primary Gender Equity												
Year	GER Primary (1-4)				GER Primary (5-8)				GER Primary (1-8)			
	M	F	GPI	Gender Gap	M	F	GPI	Gender Gap	M	F	GPI	Gender Gap
2005	128.0	116.6	0.91	11.4	60.2	54.1	0.90	6.2	96.5	87.5	0.91	9.0
2006	130.4	117.6	0.90	12.8	59.2	53.1	0.90	6.0	97.3	87.6	0.90	9.7
2007	133.0	118.9	0.89	14.2	62.6	55.8	0.89	6.8	100.3	89.5	0.89	10.8
2008	154.7	136.1	0.88	18.7	67.0	58.0	0.87	9.0	111.8	97.9	0.88	13.9
2009	152.9	134.2	0.88	18.8	68.9	58.9	0.85	10.0	111.5	97.1	0.87	14.5

GRAPH 2.17. FIVE YEARS TREND OF PRIMARY GENDER EQUITY BY GER

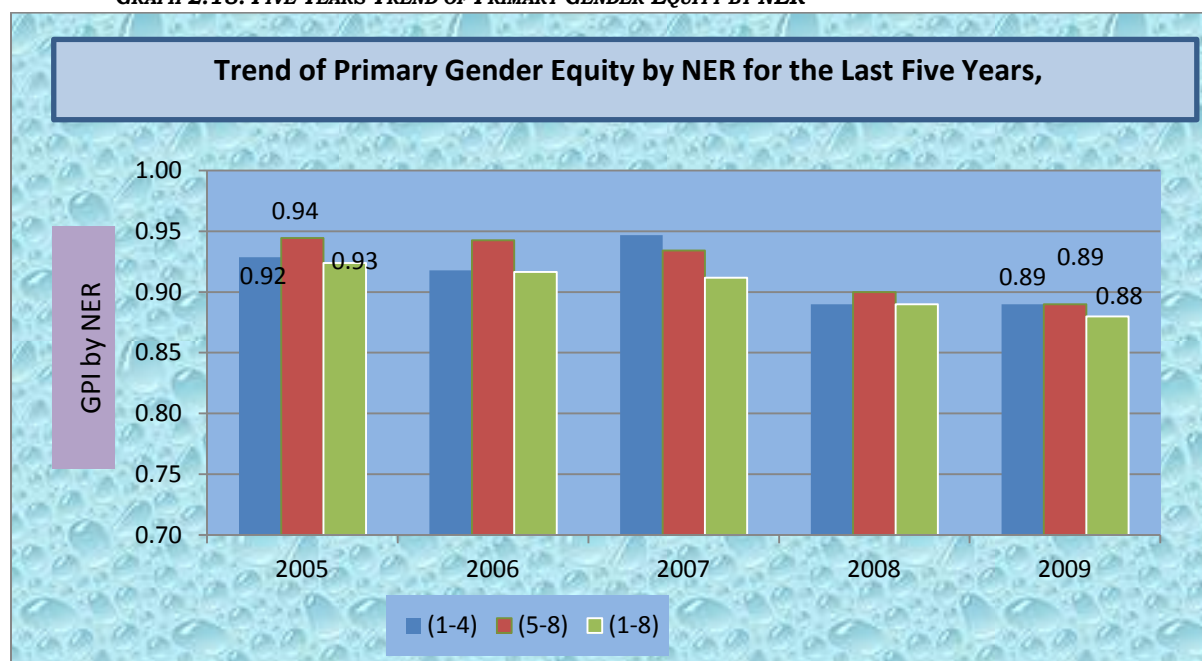

It is possible to see from table 2.31 and graph 2.17 above that the primary education gender gap has been increasing and the GPI has decreasing for the last five years by GER. For example, it has been 0.91 GPI in 2005 (2012/13 G.C) and then decreased to 0.87 in 2009 (2016/17 G.C).

TABLE 2.32. FIVE YEARS TREND OF PRIMARY GENDER EQUITY BY NER

Trend of Primary Gender Equity by NER for the Last Five Years												
Year	NER Primary (1-4)				NER Primary (5-8)				NER Primary (1-8)			
	M	F	GPI	Gender Gap	M	F	GPI	Gender Gap	M	F	GPI	Gender Gap
2005	99.3	92.2	0.93	7.1	44.9	42.4	0.94	2.5	88.1	81.4	0.92	6.7
2006	103.4	94.9	0.92	8.5	45.2	42.6	0.94	2.6	89.7	82.2	0.92	7.5
2007	99.43	94.1	0.95	5.3	48.4	45.2	0.93	3.2	90.7	82.7	0.91	8.0
2008	126.9	113.4	0.89	13.5	53.2	48.1	0.90	5.1	103.9	92.4	0.89	11.4
2009	126.6	112.6	0.89	14.0	54.8	48.7	0.89	6.1	103.5	91.4	0.88	12.0

GRAPH 2.18. FIVE YEARS TREND OF PRIMARY GENDER EQUITY BY NER

As can be seen from table 2.32 and graph 2.18 above, gender equity of primary (1-8) by NER has been 6.7% and 0.92 Gender Gap and GPI respectively in 2005 (2012/13 G.C) and in 2009 (2016/17 G.C) Gender Gap has increased to 12.0% and GPI has decreased to 0.88 which shows the participation related to gender goes apart i.e male participation is increasing and female participation is decreasing.

2.5. Quality of Primary Education

Quality of education is the key indicator to detect whether a given country is on the right track to achieve the intended goal of its education system. Quality of education system may refer to many different characteristics, such as quality of inputs into education system, process, quality of educational outputs and outcomes. Here in this publication we focus on quality, in relation to educational inputs such as teacher's quality and class size in our education system. Some indicators of quality depend on the total number of students enrolled.

2.5.1. Teachers in Primary Education

I. Qualification of Teachers in Primary Education

The performance of pupils in primary schools is greatly affected by the quality of the teaching force and is one of the main factors, which affect the quality of education. That is, whether the educational qualifications of the teacher meet the requirements of the level he/she is teaching. According to national standards, primary education requires teachers with minimum qualification of Diploma from College of Teachers Education.

The Annual School Census 2009 captured the total number of teachers in the primary sector by zone and gender. A total of 145,679 (86,898 Male and 58,781 Female) teachers were registered in all primary schools. Regarding to ownership out of 145,679 teachers 137,395 (94.3%) teachers were in government schools while 8,284 (5.7%) teachers were in Non- Government schools by the year 2009 (2016/17 G.C).

As illustrated in table 2.33 below the percentage of teacher's qualification for primary first cycle schools at regional level is 68.5% (M=61.2% & F=75.8%). Whereas as indicated in table 2.34 below the percentage of qualified teachers in primary second cycle schools is 95.4% (M=94.6% & F=97.7%). Table 2.35 also shows the percentage of qualified primary /1-8/ teachers that it reaches 80.4% (M=79.0% F=82.4%) at regional level. Consequently, the data indicates that the qualification of teachers is another area which needs special attention from concerned bodies particularly for primary first cycle.

II. Primary Natural Science and Mathematics Teachers

Data of natural Science and Mathematics primary teachers also collected and identified in Government and Non-Government Schools, Table 2.37 below indicates that there were 54,698 (Male=35,522 and Female=19,176) natural science and mathematics teachers were in primary schools. Among all 145,679 primary School teachers of the region, natural science and mathematics teachers have a share of (37.5%). These indicate more than 1/3rd of our teachers are involved in science and mathematics, which shows our recruitment of teachers, is on the right track that realizes the intention of country towards science and technology.

Regarding to gender participation of 54,698 natural science and mathematics teachers 13,014 (23.8%) of them are graduates of Mathematics, 6,258 (11.4%) in Physics, 6,686 (12.1%) in Chemistry, 8,478 (15.5%) in Biology, 18,233 (33.3%) in Natural Science and 2,029(3.7%) in mathematics and basic science.

2.5.2. Education Quality Indicators

2.5.2.1. Pupil Teacher Ratio and Pupil Section Ratio

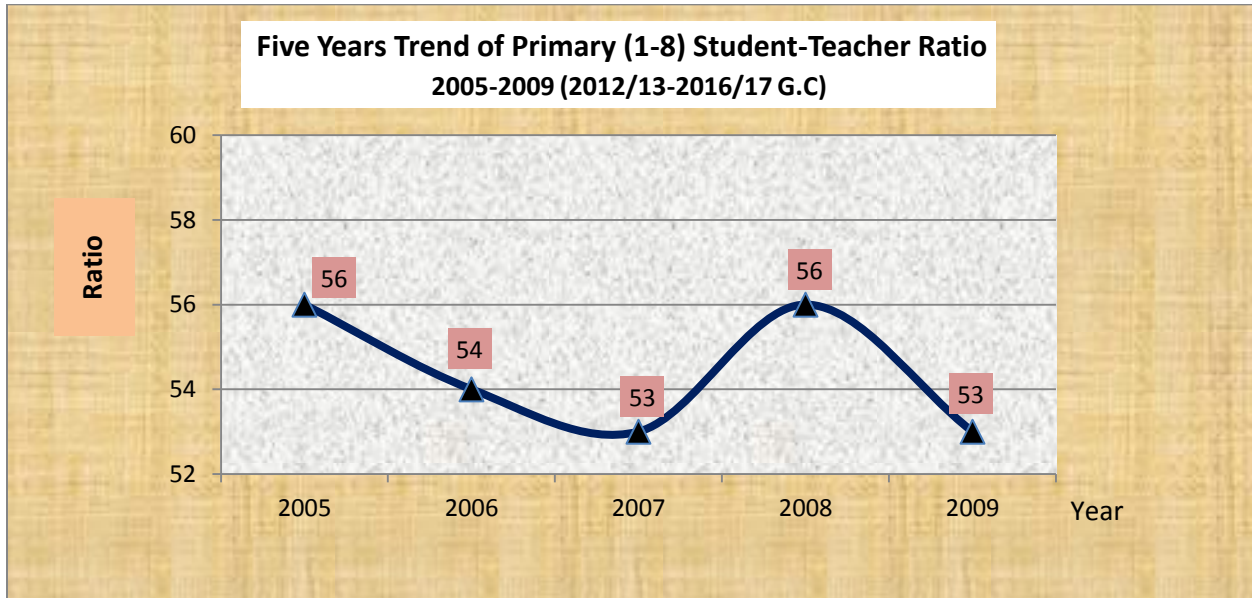

This is one of the most common indicators of quality education used in educational planning. It is believed that a lower number of pupils per teacher and Section indicate that pupils will have better chance of contact with their teachers with in manageable class room. The standard set for pupil teacher ratio for primary education is 50:1. Findings from 2009 school census reveal that the overall PTR of the year is 53:1 as indicated in table 2.39 below:

It is indicated in the findings that, Hararge East, Hararge West and Guji zones also were with the highest PTR registered at 72, 72, and 62 respectively in 2016/17 G.C. This might be due to low attraction and retention of teachers in the area as compared with the Administrative Towns such as Lege Tafo Lege Dadhi Sebeta and Gelan with the lowest Ratio of 28, 28 and 20 respectively, where attraction and retention is high. This can be lessened by increasing incentive schemes for teacher like; constructing more teachers' houses and improving the social infrastructure in those Zones with higher Student to Teacher Ratios is recommendable. As shown from Graph 2.19 below, the PTR trend over five years shows that it has been improving at a rate of 1.1%.

Concerning the Pupil section ratio (PSR) it is one of the educational quality indicators that indicate average number of pupils per class. It gives a rough estimation of class size, assesses the efficiency of resource utilization and it also used to assess the teaching- learning process. The national standard of PSR is 50:1 for primary education. Graph 2.20 below shows the trend of PSR of the last five years in the region.

As it is indicated on the graph, the trend of last five years shows that PSR in primary school has moved from 58:1 in 2005 to 60:1 in 2009. Furthermore, PSR of 2009 at regional and zonal level were illustrated on the table 2.39 below.

As can be seen from table 2.51 above, it was found that 5,433 primary schools have mini media materials from which 3,422 schools (63.0%) are functional. On the other hand number of functional radios in these primary schools reported to be 15,762 where as none functional radios were 8,658 which needs maintenance and discarded by radio technicians who are working in 6 radio stations found in different location of the region. The use of pre recorded lessons was also used in schools by different storage devices like (memory, compact disc flash and others) helps to implement the broadcasting. As shown on the same table, tape recorders are available in some schools that support the media learning (instructional radio lessons).

2.7. Primary Schools Finance

Ownership of schools in Oromia Region include; Government, Private, faith based and other organizations. In year 2009 (2016/17), Government owned primary schools have the biggest share which was 93.5% followed by private founded schools (4.43%). Faith based and others owned schools have a share of only 2.07%.

The Government funding procedure is passed through two steps process. The first involves fiscal transfers from the federal government to the regions and the second from regional governments to *woredas*. Accordingly, Woredas allocate the block grant for primary and secondary general education and the regional education Bureau for preparatory schools, based on the enrollment they had. Additionally, the GEQIP school grant also allocated accordingly based on the number of students enrolled in the last academic year.

However, all levels of schools independently generate additional budget from different sources, for example by generating their internal income, community participation and NGO donation. Tables 2.53 below illustrate the overall revenue of Government primary schools. It demonstrates the financial information of the year, which was collected from the annual school census questionnaire. The tables indicate revenue of the region by zonal level.

2.8 Efficiency of Primary Education

Education system is said to be efficient if maximum output is obtained from a given input or if a given output is obtained with minimum possible input. The problems of measuring efficiency in education however are considerable. There are several indicators used to measure the efficiency of the education system.

2.8.1. Indicators of Internal efficiency

The Internal Efficiency Rate (IER) is the ratio of student's years that should be ideally spent to carry out a certain number of students at the end of primary cycle out of the number of students-years effectively spent.

$$\text{IER} = \frac{\text{Student's years that should be ideally spent}}{\text{Number of student's years effectively spent}}$$

Internal Efficiency Rate (IER) is calculated with different methods. However, for this publication we use the longitudinal method. *Efficient students' year*: - is the ideal duration student spent in the system and its calculated by multiplying the final grade 8th survival rate by duration of primary schooling (8 years), it means (34.3% * 8 years) is equal to 274 student efficient years. Whereas, effective student years is the sum of survival rates student spent in the system for 8 years, it means the overall sum of survival rates from grade 1 to grade 8 (100% + 78.2+52.5+55.8+55.8+47.9+41.1+39.3+34.3) so, effective student years is equal to 449.

Interpretation of the Internal Efficiency Rate: - Internal Efficiency Rate is a number between 0 and 1. The more this ratio is close to 1, the more the system is efficient. It is complementary to 1 (1-IER) is interpreted as the percentage of resources wasted, because these resources have been used to finance dropouts and repeaters.

Formulas for Calculating IER by Longitudinal Method

$$\text{IER} = \frac{(\text{Survival Rate for the final grade} * (\text{Duration in years}) \text{ of the education level})}{\text{SUM of Survival Rates from the first to the final grade of the same education level}}$$

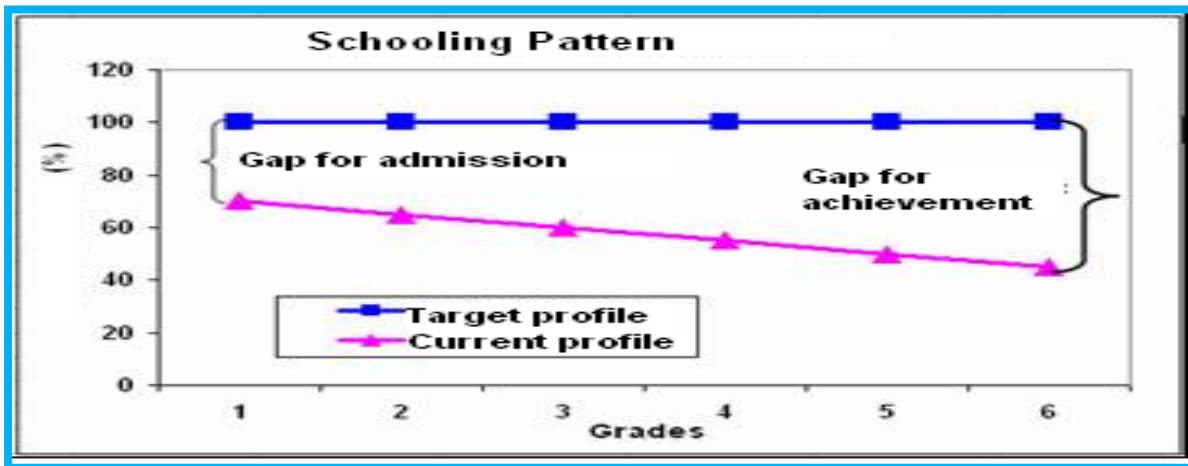

TABLE 2.54. PRIMARY EDUCATION INTERNAL EFFICIENCY RATE (IER)

Internal Efficiency Rate (IER) with Longitudinal Method in 2009 E.C (2016/17)

2.8.2. Schooling Profile /Enrolment Pattern/

The schooling profile is, constituted of Age-Specific Enrolment Ratio for a given cycle of the education system.

GRAPH 2.21 ENROLMENT PATTERN

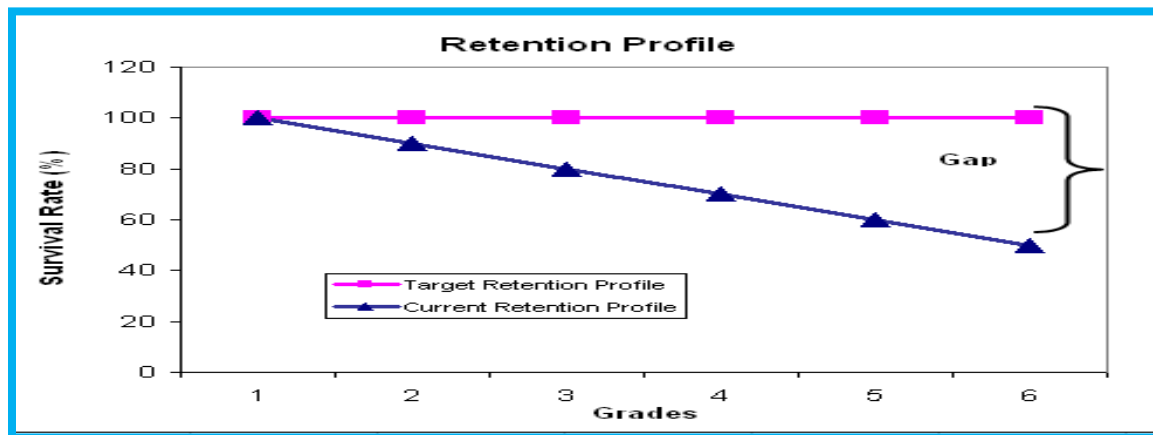

The schooling pattern interpreted as the student flow through the education cycle. Its trend determines the efficiency of the system to keep students in the system until they complete their schooling.

The value of the schooling profile resides mainly in its ability, as per figure above to visually indicate the level of enrolment for each grade and to easily distinguish between access and retention issues, particularly it distinguishes between the two main factors of weak cycle completion. The figure graphically illustrates the most common situations; thus, a flat schooling profile constitutes retention ideal for the system (no dropout); conversely, a slanted profile reflects the scale of dropout throughout the cycle.

2.8.3 Retention Profile

The retention profile is, constituted by the series of survival rate at each grade level. It measures the capacity of the system to keep students in the system until they complete their schooling. Data required to determine retention profile are Enrolment and News entrants by grade at least for two years

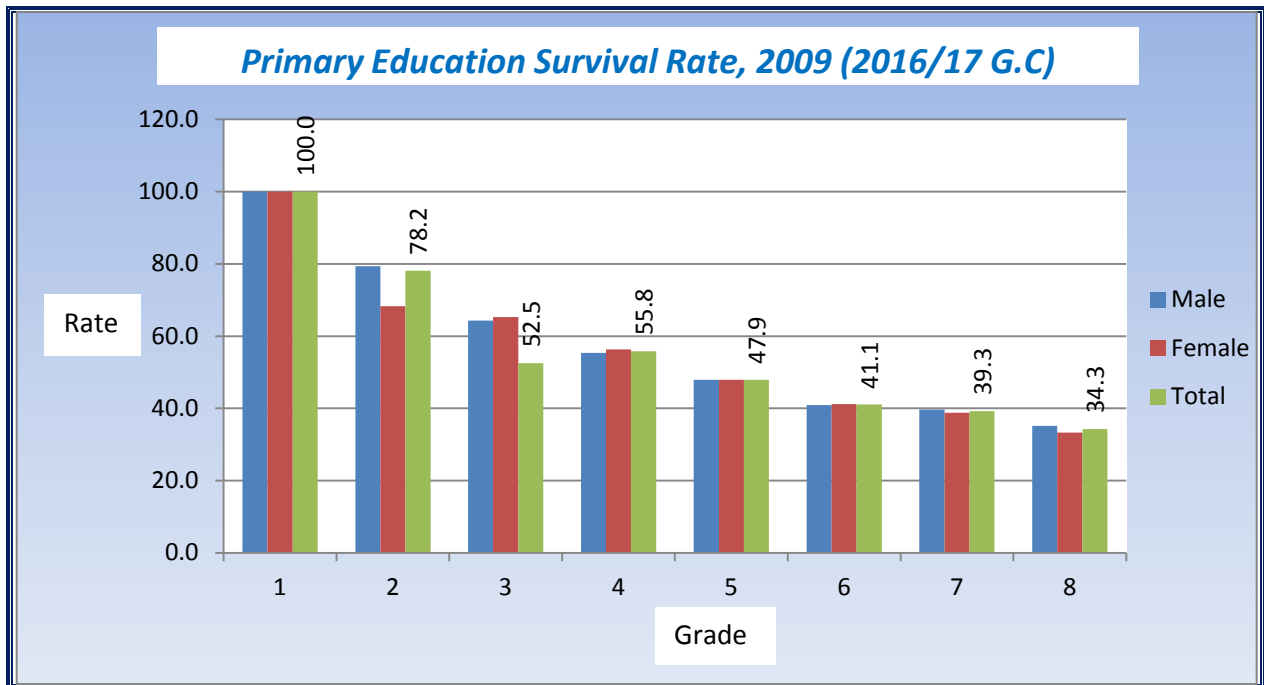

GRAPH 2.22 RETENTION PROFILE

2.8.4. Survival Rate (SR)

A survival rate approaching 100% indicates a high level of retention and low incidence of dropout. Survival rates may vary from grade to grade, giving an indication of grades with relatively more or less dropouts. The distinction between survival rates with and without repetition is necessary to compare the extent of wastage due to dropout and repetition.

GRAPH 2.23 PRIMARY EDUCATION SURVIVAL RATE

2.8.5 Schooling Profiles and Retention Profiles by Longitudinal Method

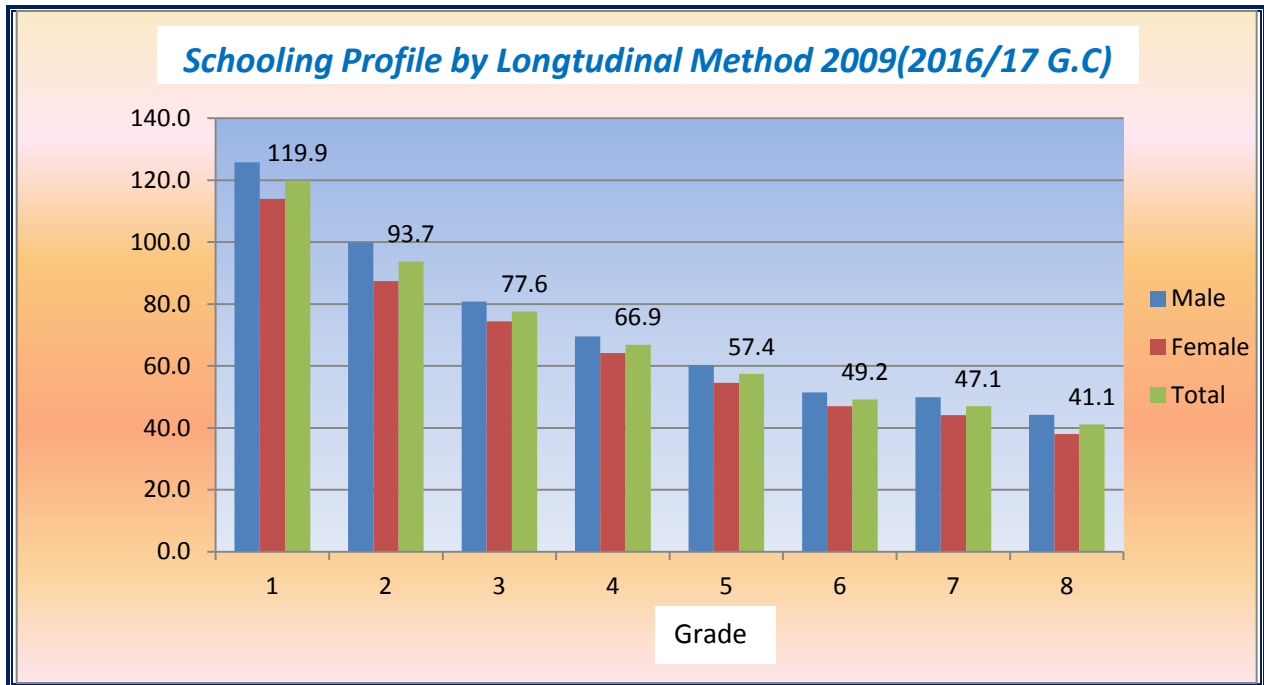

Schooling profiles present the advantage of providing more detailed information on enrolment than the simple average offered by the GER. It gives a visual representation of schooling careers, from cycle access to completion. It also enables the analysis of retention, providing a more precise enrolment diagnosis. There are three main approaches to building schooling profiles; however, in this section we will be reviewed only the longitudinal method. These methods rely on different basic information offer a specific interpretation and complementary. The Longitudinal Profile follows one cohort of students through the cycle, and describes their progression through the successive grades of the cycle.

Data required for Longitudinal Method are, new entrants by grade for consecutive years of the total duration of education level. For instance, in Ethiopia we need data for 8 consecutive years and population at the official school entrance age.

GRAPH 2.24. SCHOOLING PROFILE BY LONGITUDINAL METHOD

2.9. Internal Efficiency and Flow Rate

The quantitative goals of education systems are not limited in increasing the number of children enrolled but also to ensure that children who begin a cycle complete it (do not quit), and do so in the set number of years (do not repeat). Indeed, the pedagogical programs of each cycle are developed in such a way as to progressively provide learners with a coherent and self-reinforcing set of knowledge and skills. The early abandon of a cycle is thus likely to result in the partial or total loss of the knowledge and skills acquired in the years effectively attended. The most widely mentioned example is that of sustainable literacy, acquired during primary education. Indeed, even if many children know how to read and write before the end of the cycle, it has been empirically demonstrated that a significant share of students who did not complete the primary cycle lose their literacy after a number of years if they are not practicing.

Analyzing the flow of pupils through a cycle and evaluating internal efficiency consists of comparing the number of children that access the first grade of the cycle with the number that reach the last grade in the set number of years (without repetition).

Promotion, Repetition and Dropout rates are the paths of student flow from grade to grade and characterize the efficiency of the education system in generating graduates. These rates are used

for evaluating, monitoring and projecting the efficiency of students flow in our education systems. In this publication the primary education system of Oromia can be evaluated in terms these internal efficiency indicators as follows.

TABLE 2.56 PRIMARY INTERNAL EFFICIENCY BY CYCLE

2.9.1. Primary Education Promotion Rate (PR)

Promotion Rate is the proportion of pupils enrolled in a given grades that reach the next grade in the following year. The data required in this calculation is new entrants in grade *j* for year *T* and

enrolment in grade (j-1) for year (T-1). It is also interpreted as a high level of promotion rate indicates a high level of retention or survival rate.

$$PR = \frac{\text{New entrants in grade } j \text{ for year } T}{\text{Enrolment in grade } (j-1) \text{ for year } (T-1)} \times 100$$

GRAPH 2.25. PRIMARY EDUCATION PROMOTION RATE

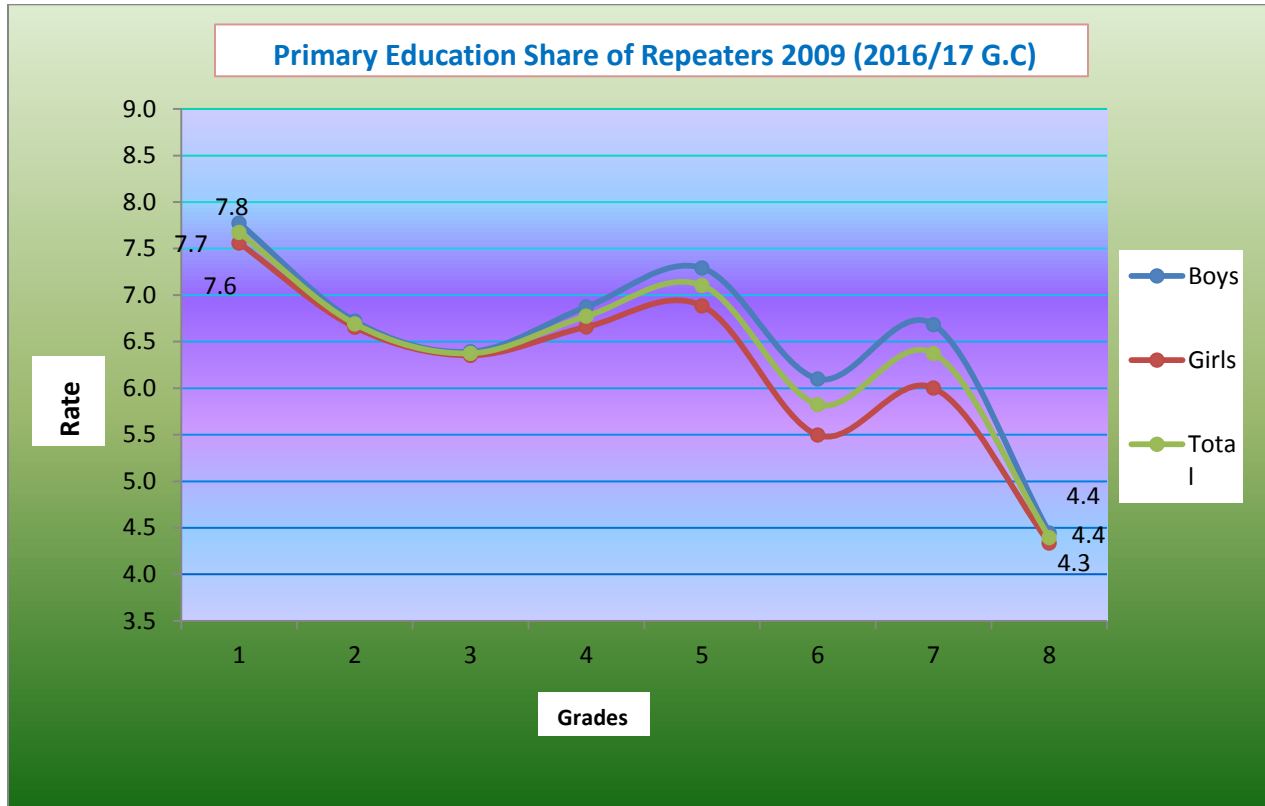

2.9.2. Primary Education Repetition Rate (RR)

Repetition can be measured through two indicators repetition rate and the share of repeaters. Generally, share of repeaters and repetition rate are fairly close indicators, in situations where enrolment increases significantly, the share of repeaters may be slightly lower than the repetition. The repetition rate measures the number of pupils that are refused promotion to the following grade. The share of repeaters presents the advantage of only requiring one year of data for its computation and is therefore more immediate. The Share of Repeaters is the percentage of repeaters in a grade or cycle of the same year:

$$\text{Share of Repeaters} = \frac{\text{Number of Repeaters}}{\text{Total Enrolment}}$$

As it shows from the graph 2.26, the RR of grade 1 of the year were 7.3% while the share of repeaters of grade 1 as shown from graph 2.25, it was a little bit higher than with the rate of 7.7%. Furthermore, grade 8th RR 4.8% is also a slight less than the share of repeaters with the rate of 4.4% as well.

GRAPH 2.26. PRIMARY EDUCATION SHARE OF REPEATERS

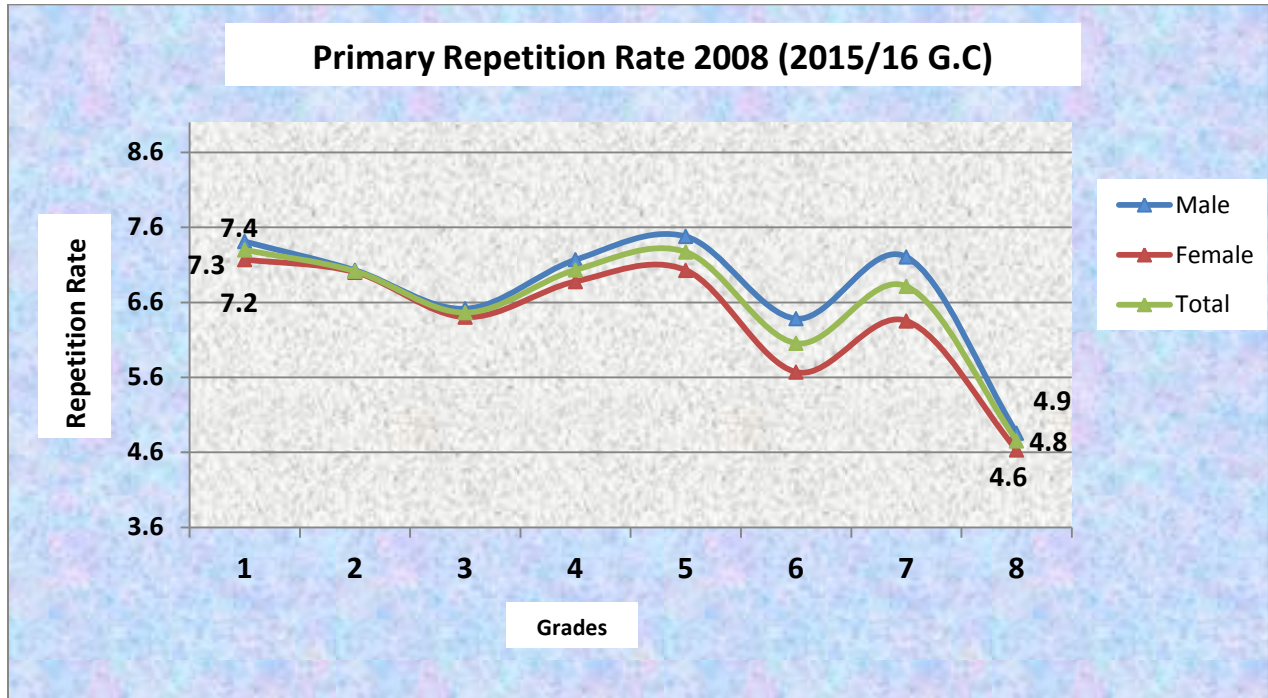

Repetition Rate: - is the proportion of pupils enrolled in a given grade for a given year who studies in the same grade for the following year. Data required for this calculation is repeaters of grade j , in year T and enrolment of grade j of year $T-1$. It is interpreted as a high level of the repetition rate indicates a high level of repetition of grades. The problem of repeating has impact on the system. Because.

1. Repeating has wasted the resources they have used while they repeat in the same grade.
2. They occupied a school space that can be used by the other new comers.

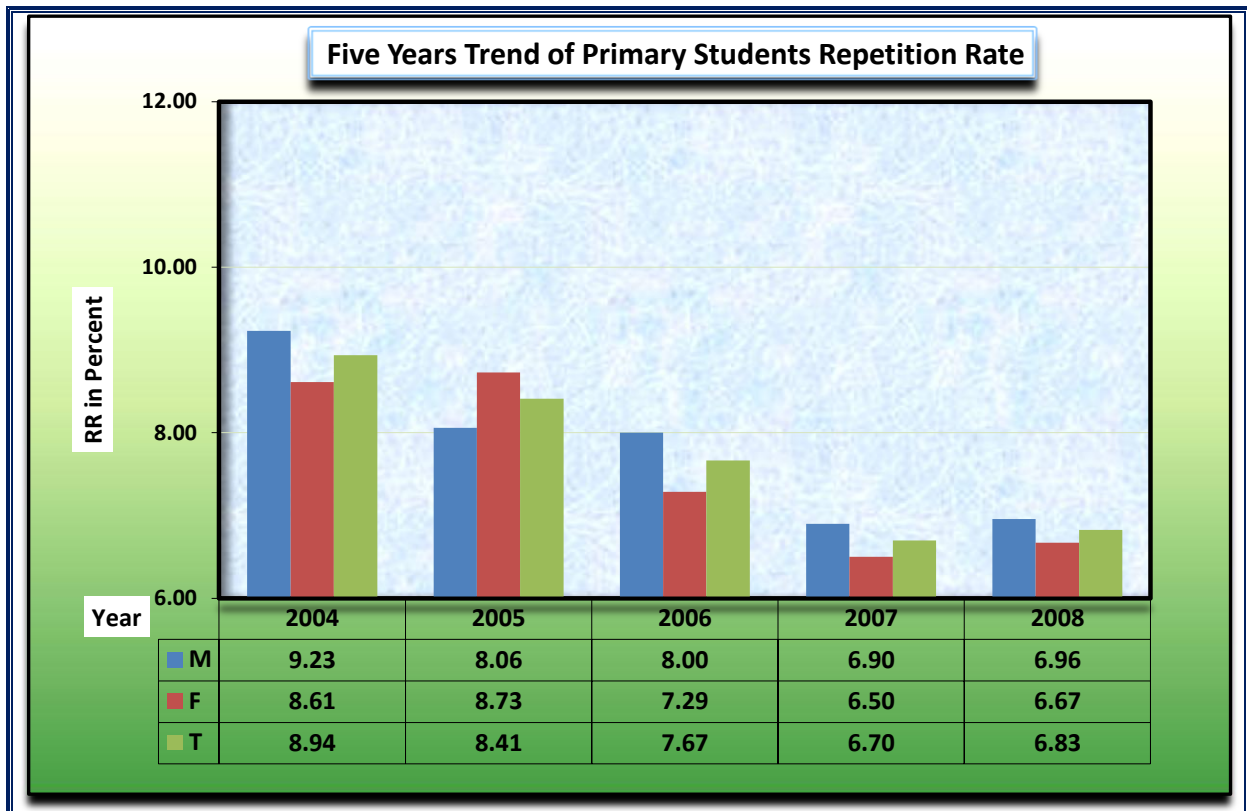

The formula to calculate Repetition Rate is;

$$RR = \frac{\text{Repeaters of grade } j, \text{ year } (T)}{\text{Enrolment of grade } j, \text{ year } (T-1)} \times 100$$

GRAPH 2.27. PRIMARY EDUCATION REPETITION RATE

GRAPH 2.28. FIVE YEARS TREND OF PRIMARY STUDENTS REPETITION RATE

Repetition has decreased from 8.94% in 2004 to 6.83% in 2008. However, there is some evidence that administrative data understate the level of repetition, as some students may be recorded as new entrants when actually they have dropped out of school and return to the same grade, this is frequent in Primary first cycle. The pattern of repetition is similar from one grade to another (see Graph 2.27 above), although the level of repetition rates is clearly higher in the lower grades. The repetition rate for Grade 8th is lower than other grades.

2.9.3 Primary Education Dropout Rates (DR)

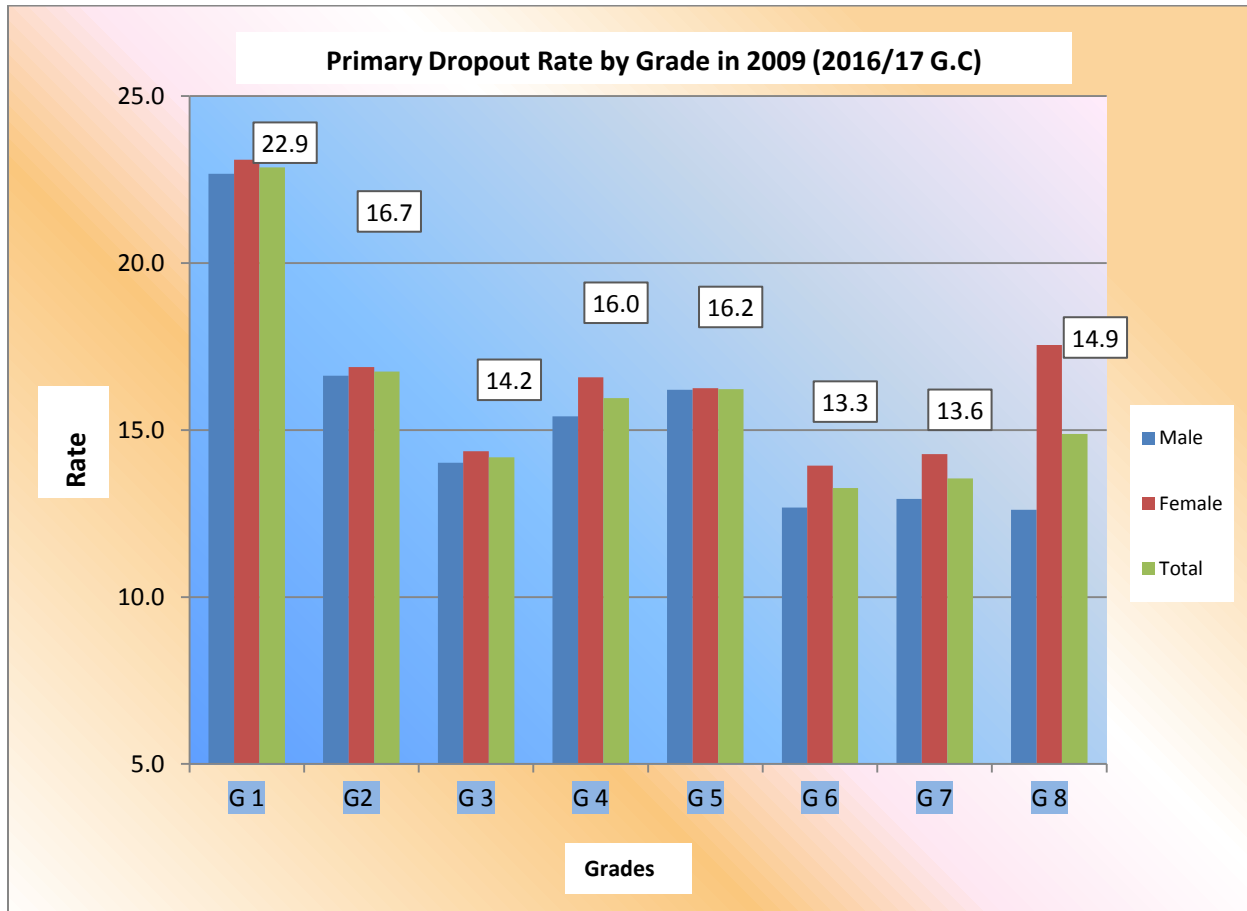

Dropout Rate is proportion of pupils who withdraw from education system for more than one year. It corresponds to the difference between 100% and the sum of promotion rate and repetition rates, the dropout rate requires Promotion Rate and Repetition rate data. The formula to calculate dropout is,

$$\text{Drop-out Rate} = [100\% - (\text{promotion rate} + \text{repetition rate})]$$

High dropout rate constitutes interpreted as an obstacle in the achievement of efficient primary education completion. However, if dropout problem were not resolved, different impact was happened in the system, among such problems;

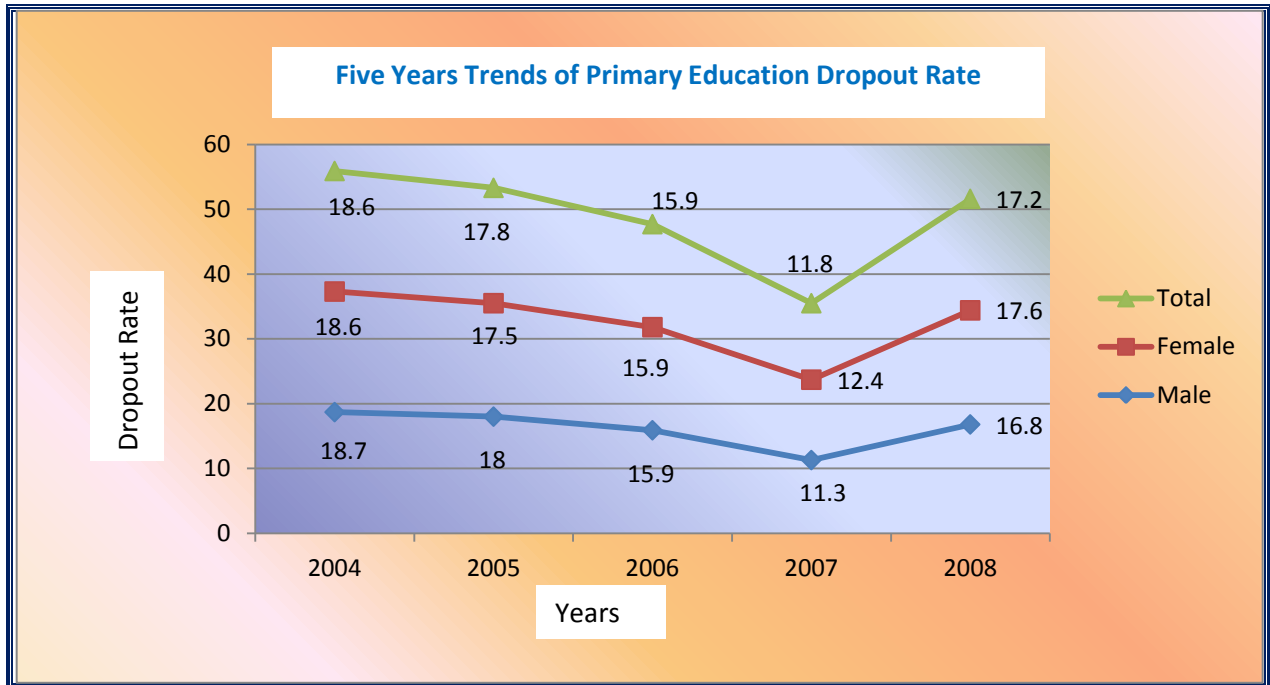

1. Dropouts have wasted the resources.
2. They occupied a school space, which could use the other new comers if they readmitted.
3. They have not acquired the minimal levels of literacy and numeracy if they dropped out in early grades.

GRAPH 2.29. PRIMARY EDUCATION DROPOUT RATE BY GRADE

As shown on graph 2.29, in 2009 the Dropout rate are higher in Primary first cycle than in primary second cycle. It was 22.9% at grade 1 and 14.9% at grade 8th as well as 16% at grade 4th. Apparently graph 2.30 indicates the comparison & trend of five years dropout. As shown, it has decreased from 18.6% in 2004 to 12.6% in 2008. The trend of Grade 1 dropout on graph 2.31 also shows that it decreased from 24.7% in 2004 to 22.9% in 2008.

2.9.4 Transition Rate (TR)

Transition Rate is new entrants to the first grade of primary second cycle (5th grade) or the beginning of secondary first cycle (9th grade) in a given year, expressed as a percentage of the number of pupils enrolled in the final grade of primary first cycle or primary second cycle education in the previous year respectively. Data required for calculating is new entrants in first grade of primary second cycle or first grade of secondary first cycle for a given Year **T**, and total enrolment in final grade of primary first cycle or primary second cycle for Year (**T-1**). For example, if the increment of transition rate of primary students to secondary is raised, in the same way the proportion of pupils from primary education who reaches secondary education also elevated up. Method of calculation for **TR** is the following;

$$\text{Grade 4 Transition Rate or TR to 5}^{\text{th}} = \frac{\text{New entrants in 5 th for Year T}}{\text{Enrolment of 4 th for Year T - 1}} \times 100$$

$$\text{Grade 8 Transition rate or TR to 9}^{\text{th}} = \frac{\text{New entrants in 9th for Year T}}{\text{Enrolment of 8th for Year T - 1}} \times 100$$

The reason why some zones and administrative towns being blank is that it is impossible to get two years consecutive data at the time of data gathering. Because these zones and administrative are splitted from some other zones. For example; West Guji is splitted from Borena and Guji, Buno Bedellee is splitted for Ilu Aba Bora, Woliso administrative town is splitted from South West Shoa etc.

GRAPH 2.32. FIVE YEARS TREND OF TRANSITION RATE IN PRIMARY EDUCATION

2.9.3.5. Primary Completion Rate

Primary Completion Rate is highly dependent on the accuracy of the single age population for both points of measurement (for Grade 8th, age 14 and for Grade 5th age 11) Table 2.62 below shows the Completion Rates for both Grade 5th and Grade 8th.

A high primary completion rate indicates a high degree of coverage, whether the pupils belong to the population of official/typical graduation age (14 years) or not. A school is classified as incomplete when it does not offer all the grades of a given cycle. In such cases the risk of dropout is high, especially if no alternative school nearby offers the missing grades.

Definition: Total number of new entrants who registered for grade 8th living examination regardless of age, expressed as percentage of the total population aged 14 years.

The Primary Completion Rate is internationally an established measure of the outcomes of an education system and calculated with the following formula, Where

“New entrant in last Grade” = (Total pupils in last Grade – repeaters in last grade)

$$\text{Completion Rate} = \frac{\text{New entrant in last Grade}}{\text{Population of official age in last grade}}$$

Borena and West Hararge have the least performing zones of primary completion rate include 23.65% and 24.8% respectively.

2.10. Primary Education Cohort Analysis

A *cohort* is defined as a group of persons who jointly experience a series of specific events over a period of time. Accordingly, we may define a pupil cohort as a group of pupils who join the first grade of a given cycle in the same school year, and subsequently experience the events of promotion, repetition, dropout or successful completion of the final grade, each in his/her own way.

There are three ways to analyze the internal efficiency of an education system by means of the cohort pupil flow method, depending on the type of data collected: (i) true cohort, (ii) apparent cohort, and (iii) reconstructed cohort. The ideal way to obtain a precise assessment of educational wastage is through the use of the *true cohort method*. This involves either a tracer (longitudinal) study to monitor the progress of a selected cohort of pupils through the education cycle, or through a retrospective study of school records in order to retrace the flows of pupils through the grades in past years.

The true cohort method is costly and time-consuming, and it requires good and reliable school-records with information on individual pupils. For this reason, this method is not yet widely used. In the absence of individualized pupil information, internal efficiency in education can be assessed by putting in to consideration the enrolment data by grade for at least two consecutive years using either the apparent or reconstructed cohort methods.

The apparent cohort method is applied when there is no data on repeaters. Then the enrolment in grade 1 in a particular year is compared with enrolment in the successive grades during successive years, and it is assumed that the decrease from each grade to the next corresponds to wastage. This method, the most commonly used so far, produces very approximate estimates of drop-out, and its main weakness is that it assumes that pupils are either promoted or drop-out of the school system. This method is quite appropriate for countries practicing automatic promotion from grade to grade.

A more pertinent and commonly used method is the reconstructed cohort method; we also used this method for this publication. Reconstructed cohort method is less dependent on the availability of detailed data over time. To apply this method, data on enrolment by grade for two consecutive years, together with data on repeaters by grade from the first to second year, are

sufficient to enable the estimation of three main flow-rates: promotion, repetition and dropout. Once obtained, these rates may be analyzed first of all by grade to study the patterns of repetition and drop-out. Then they can be used to reconstruct a pupil-cohort flow in order to derive other indicators of internal efficiency. This is illustrated as follows.

2.9.6.1 Flow Rates Using Data on Enrolment and Repeaters

The methodology of the reconstructed cohort flow model is based on the fundamental concept that for pupils enrolled in a given grade in a given year, there can be only three eventualities: (a) some of them will be promoted to the next higher grade in the next school year; (b) others will repeat the same grade in the next school year; and (c) the remaining pupils will drop-out of school in the course of the year.

Hypothetical Flow Diagram of the Cohort through Primary Education

Assumption of Cohort Analysis

The flow of a fictitious cohort of 1,000 pupils through the primary education cycle of our Region can be reconstructed below, based on three assumptions:

1. At any given grade, the same rates of repetition, promotion, and drop-out apply, regardless of whether a pupil has reached that grade directly or after one or more repetitions (hypothesis of homogenous behavior), it also assumes that no pupil skips a grade, i.e., there is no double promotion.
2. There will be no additional pupils (new entrants) in any of the subsequent years during the life time of the cohort, other than original cohort of 1,000 pupils; and no in-migration or out-migrations throughout the cohort years.
3. Pupils in a grade are, allowed to repeat only twice. However, in reality a pupil may repeat a grade more than twice. In this case, the assumption remains constant and allows only for the repeating of the grade twice.

In analyzing hypothetical flow diagram of reconstruction cohort method of our Regional Government primary education system, one can analyze as follows. There were 1,902,735 pupils registered in grade 1 in 2008 EFY.

To reconstruct the history of 1,902,735 pupils entering grade 1, it is easier to express this starting cohort as an index of 1,000 pupils, and all operations are consequently translated in 'per thousand' terms. Thus, when applying each flow-rate for grade 1 to this fictitious cohort of 1,000 pupils (instead of the actual 1,902,735 pupils), 247 (24.7 %) pupils were dropped-out and 753 (75.3%) promoted to grade 2 from grade 1. Using the flow rates from 753 pupils reaching grade 2 were 57 (5.7%) pupils were repeated, 135 dropped-out (13.5 %) and 617 (61.7%) were promoted to grade 3 and so on. It may be noted that the first diagonal row in the diagram below (next page) is obtained by multiplying the successive promotion rates for successive grades and successive years. The repetition and dropout rates are then applied to obtain the second, the third and the fourth rows.

As the cohort from table 2.64 showed, to get the survived pupils of grade 1, summing the number of drop-outs from each grade in consecutive three years (2008, 2009 & 2010) we obtain $(229+17+1) = 247$ drop-outs, and finally by subtracting the sum of dropped-out from 1,000 pupils it would give 753 survivals in grade 1. Finally, to find the survived pupils of primary education, firstly summing the drop-outs from each grade of final year we found a total of 774 $(247+135+93+89+75+50+44+40)$ consecutively from grade 1 to 8, pupils who dropped out without completing primary education (as graduates). Thus, out of the initial pupil cohort of 1,000, only 216, or about 21.6%, graduated from the primary cycle. Accordingly, among 217 graduated pupils only 129 graduates without repeating any grade and 68 with a one-year delay as well as 20 graduated with two years delay.

Multiplying this number of graduates by the number of grades $(217 \times 8 = 1,736)$ would give the ideal number of pupil-years required to produce the graduates. The ratio between the latter and the actual number of pupil years used by the cohort, i.e. 4,538, gives the coefficient of efficiency $(1,736 \div 4,538 = 0.382$ or 38.2%).

The years input per graduate (21 years) is obtained by dividing the total number of pupil-years spent by the cohort (4,538) by the total number of graduates (217). The years input per graduate can then be compared to the ideal number required, which is simply the duration of the education cycle 8 years of the cohort.

2.9.6.2. Internal Efficiency of the Cohort in Primary Education

I. Pupils Year by Grade of the Cohort

TABLE 2.67. PUPILS YEAR BY GRADE OF COHORT

Pupils Year by Grade of Cohort Analysis								
sex	Grade							
	1	2	3	4	5	6	7	8
M	1080	811	661	564	470	382	331	276
F	1077	807	655	556	456	369	315	261
Average	1078	809	658	560	464	376	324	269

I. Indicators of Retentions by Grade of the Cohort

a. Survival Rate of the Cohort

The purpose of survival rate is to measure the holding power and internal efficiency of the education system. It illustrates the situation regarding retention of pupils from grade to grade in school, and conversely the magnitude of dropout by grade. Survival rate is the proportion of cohort pupils who reached the subsequent grade expressed as a percentage of pupils enrolled in the first grade of a given cycle in a given school year. It also used to measure the impact of repetition and dropout on internal efficiency. Survival by grade obtained by adding the number of pupils who eventually will promoted to the next higher grade. In each grade, some pupils promoted to the next grade without repeating a grade and others after repeating once or twice.

TABLE 2.68. PRIMARY EDUCATION COHORT ANALYSIS SURVIVAL RATE BY GRADE

Primary Education Cohort Analysis Survival Rate by Grade (%)								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	75.5	61.9	52.5	43.7	36.0	30.9	26.4	22.8
F	75.1	61.4	51.9	42.5	35.1	29.7	25.0	20.4
average	75.3	61.7	52.2	43.2	35.6	30.3	25.8	21.7

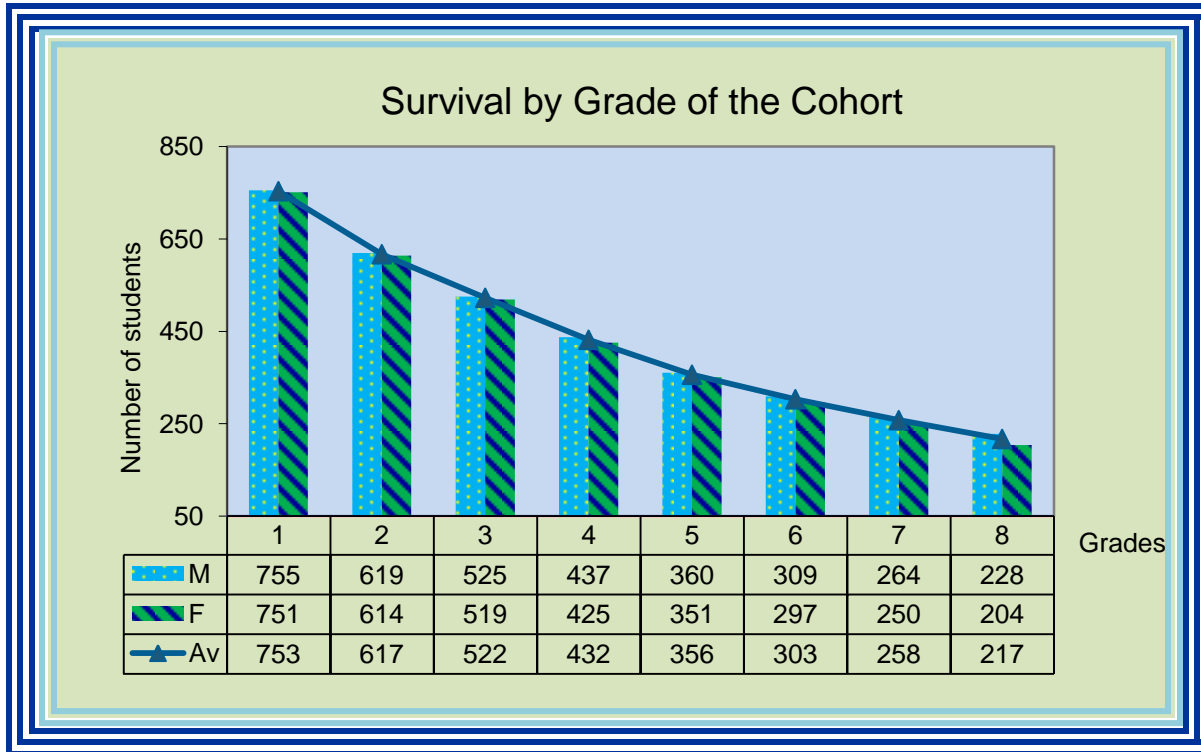

As the table 2.68 above shows among 1000 students enrolled in grade 1, only 75.3% (M=75.5%, F=75.1%) are survived in the cohort. The rest 24.7% (M=24.5%, F=24.9%) left the school before completing grade 1.

From 1000 pupils started the cohort, only 21.7% (M=22.8%, F= 20.4 %) will finally survive at grade 8. This shows that 78.3% (M=77.2%, F=79.6%) of students left the system without completing primary education. So, we can imagine how the issue needs serious attention from the concerned bodies.

TABLE 2.69 . NUMBER OF PUPILS SURVIVED IN EACH GRADE OF THE COHORT

Number of Pupils Survived in Each Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	755	619	525	437	360	309	264	228
F	751	614	519	425	351	297	250	2034
Total	753	617	522	432	356	303	258	217

GRAPH 2.33. SURVIVAL BY GRADE OF THE COHORT

b. Dropout by Grade of the Cohort

As shown in the table 2.70 below, most of the students left the system early in grade 1 and 2. About 24.7% (M=24.5%, F=24.9%) of the cohort left the system before completing grade one. Majority of children leave the system at an early stage compared to dropouts at upper grades. This is an undesirable situation, to which planners and decision makers should pay immediate attention to it.

TABLE 2.70 . PERCENTAGE OF DROPOUT BY GRADE OF THE COHORT

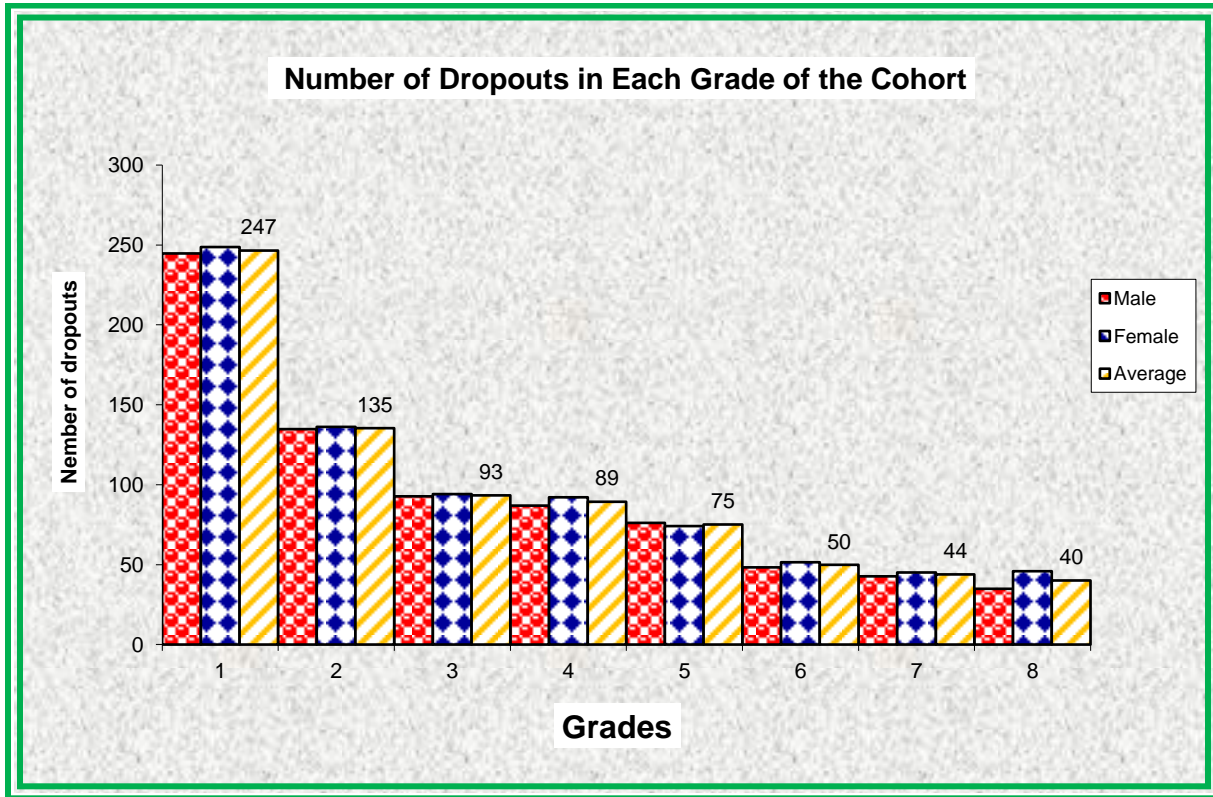

Percentage of Dropout by Grade of the Cohort (%)								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	24.5	13.5	9.3	8.7	7.6	4.8	4.3	3.5
F	24.9	13.6	9.4	9.2	7.4	5.1	4.5	4.6
average	24.7	13.5	9.3	8.9	7.5	5.0	4.4	4.0

Dropout is the proportion of students who leave the system at each grade. It is the most serious problem in education system. As the cohort data on the table 2.71 shows that, among the cohort of 1000 pupil, 247 of them left the school before completing grade one.

TABLE 2.71. NUMBER OF DROPOUT BY GRADE OF THE COHORT

Number of Dropout by Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	245	135	93	87	76	48	43	35
F	249	136	94	92	74	51	45	46
average	247	135	93	89	75	50	44	40

GRAPH 2.34. NUMBER OF DROPOUTS IN EACH GRADE OF THE COHORT

C. Repeaters by Grade of the Cohort

TABLE 2.72. REPEATERS BY GRADE OF THE COHORT

Repeaters by Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	80	57	43	40	35	24	24	13
F	77	56	42	38	32	21	20	12
average	79	57	43	39	34	23	22	13

The cohort data on the table 2.72 above shows that, among the cohort of 1000 pupils 79 of them repeated at grade one, number of repeaters gradually decreases from grade to grade while it goes up to the higher grade as shown on the table.

GRAPH 2.35. NUMBER OF REPEATERS OF THE COHORT BY GRADE

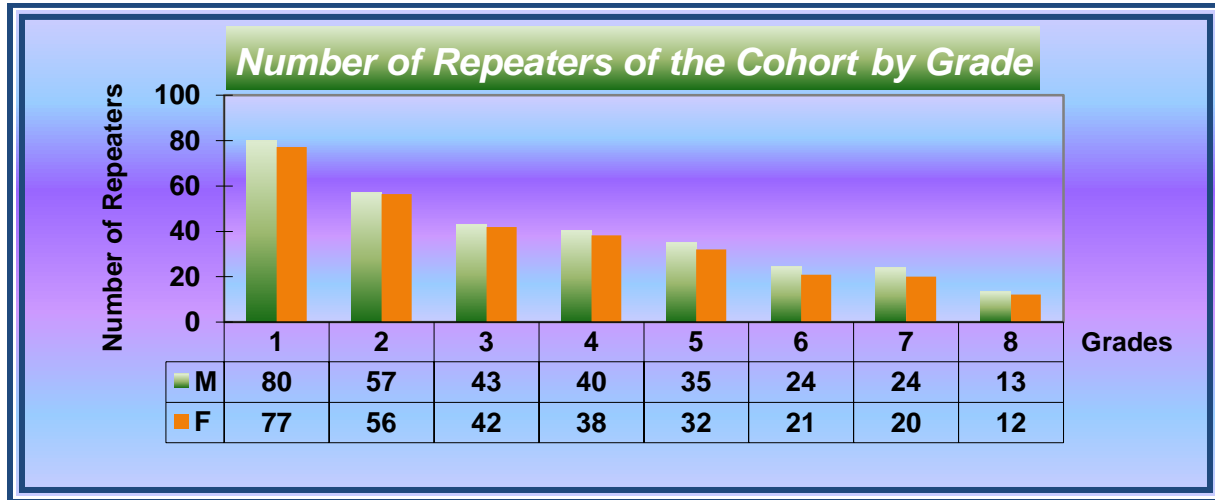

TABLE 2.73. PERCENTAGE OF REPEATERS BY GRADE OF THE COHORT

Percentage of Repeaters by Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	8.0	5.7	4.3	4.0	3.5	2.4	2.4	1.3
F	7.7	5.6	4.2	3.8	3.2	2.1	2.0	1.2
average	7.9	5.7	4.3	3.9	3.4	2.3	2.2	1.3

Table 2.73 above shows that 7.9 % (M=8.0%, F=7.7%) of the cohort repeated at grade 1. When we compare both levels, majority of children repeat in the early grades than the upper one.

D. Number of Graduates from the Final Years of the Cohort

Graduates from the final year is the number of pupils who eventually graduate (Complete) from the final year of the cycle. In other words, those who successfully complete primary first cycle of 4 years of study and promoted to the first grade of second cycle primary (Grade 5) or those who successfully complete second cycle primary of 8 years of study and promoted to first cycle secondary (Grade 9). According to the cohort shown on table 2.64, out of 1000 pupils registered in 2009 E.C at grade one, 325 pupils' will graduate grade 4 without repeating any grade during their stay in school. Another 90 pupil's will also graduate grade 4 after repeating once and 16 of them will graduated after repeating twice in any of the grades. Number of graduates of first cycle primary for this cohort is 431.

Similarly, 129 pupils will graduate grade 8 by 2015 E.C. without repeating, 68 pupils will graduate grade 8th in 2016 E.C by repeating once, finally 20 pupils will also graduate grade 8th by 2017 E.C by repeating any of the grade twice. According to the cohort, the possible number of pupil graduates from the complete primary system or grade 8 is only 217. Accordingly, only about 21.7% of the pupils complete primary education out of 1000 pupils of the cohort system. Unfortunately, about, 783 (78.3%) pupils of the cohort were left the system before completing primary education. Therefore, Educational planners, policy makers, decision makers, stakeholders and communities must work towards finding the solutions to improve this huge gap.

3. Secondary Education

Overview

Government continues to address challenges associated with ensuring quality and inclusive education in the Secondary sub-sector. The sub-sector is charged with the duty of providing places for the masses from Universal Primary Education (UPE). Secondary education is composed of two cycles, they are General Secondary Education (9-10) and Preparatory classes (11-12). General secondary education (9-10) is designed to continue the basic programs of the primary level, but teaching is typically more subject focused and requires more specialized teachers for each subject area. The end of this level often coincides with the end of compulsory education. A preparatory class (11-12) is the final stage of secondary education and the entry point to the higher institution. Therefore, instruction is often organized and even more along subject lines and teachers, typically need a higher or more subject-specific qualification. Let us look at different indicators of secondary education of our region.

This chapter gives key statistical indicators about the state and developments in the Secondary sub-sector in year 2009 E.C. These include; equitable access, quality and internal efficiency of secondary education at glance.

3.1. Secondary and Preparatory Schools Information

3.1.1. Secondary & Preparatory Schools by Ownership & Cycle

Table 3.1 below shows, secondary and preparatory schools by ownership. Accordingly, 8.6% of the secondary (9-10) schools are owned by Non-governmental organizations as compared to 91.4% of them are owned by government. Regarding preparatory schools 11.7% and 88.3% the schools are under the ownership of Nongovernment and Government respectively. As the data shows Government involvement is seems like higher than non-governmental organizations.

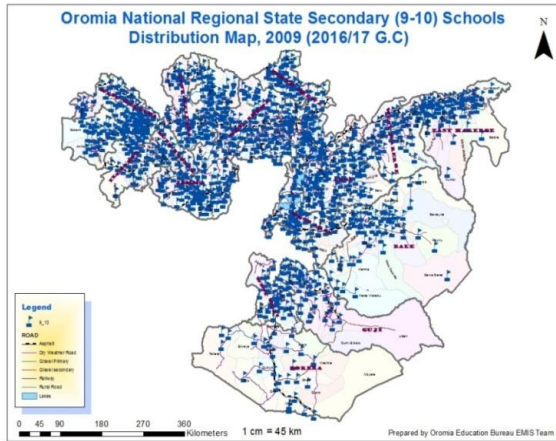

In terms of zonal distribution, secondary (9-10) schools are owned by only government in 11 zones and 5 administration towns. In the same way preparatory (11-12) schools are owned by only Government in 14 zones and 7 administration towns. This indicates that, the participation of NGOs in secondary schools is also less in zonal and administrative town level like that of regional level.

TABLE 3.1. SECONDARY SCHOOLS, BY OWNERSHIP AND CYCLE

3.1.1. Geographical Locations of Secondary schools

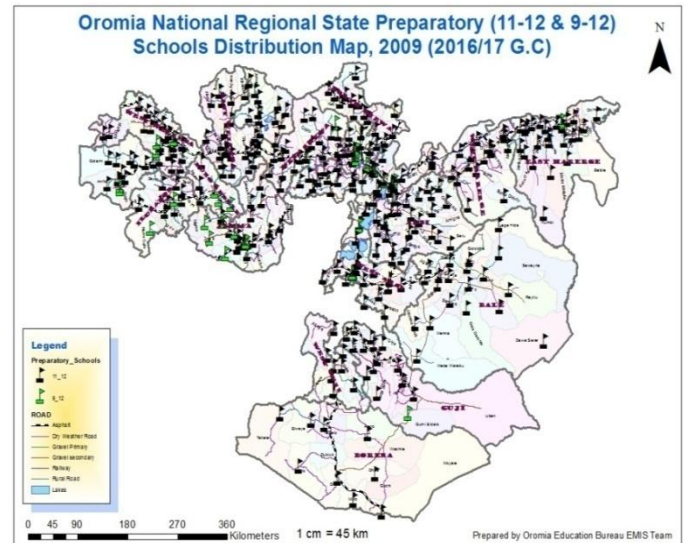

MAP 5: GEOGRAPHICAL LOCATIONS OF SECONDARY FIRST CYCLE (GRADE 9-10) SCHOOLS

Map 6 and 7 shows the distribution of secondary and preparatory schools in the Region. As we can see from the map the schools were relatively denser along the main road of the central and North East & west areas of the region for secondary first cycle and scattered in the other areas, whereas the distribution of preparatory

schools were also more scattered than secondary schools, specifically in the south eastern boarder of the region like Borena, Guji and Bale Zones. The point data on the map shows schools by grade level with different colors. The map also shows the name of woredas and the accessibility of the road to schools by type of road.

MAP 6: GEOGRAPHICAL LOCATIONS OF PREPARATORY (GRADE 11-12)

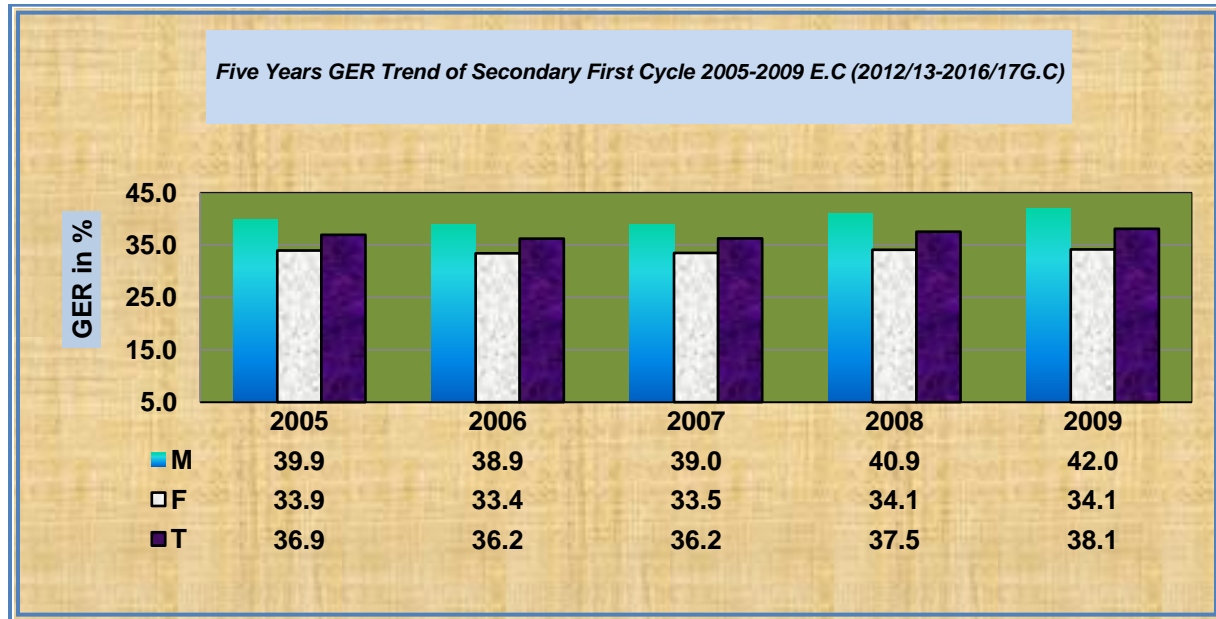

3.2. Equitable Access of Secondary and Preparatory Schools

Access is the extent to which the secondary school age population is able to join this particular level of education. Equity implies a reduction in disparities based on gender (Male/Female) and geographical location (Urban/Rural). Equity also ensures that, all students in every school will be able to avail themselves of the services, technology, materials and the qualified teaching staff that able to achieve educational success. Besides, it indicates fairness in the distribution of opportunities for education, and is the main indicator that shows educational performance.

3.2.1. Gross Enrolment Rate (GER) of General Secondary Education Grade (9-10)

GER of general secondary education (grade 9-10) is the proportion of all enrolments regardless of school age population at this level. It compares the total number of students in the general secondary school with the school-age population of this level. In Ethiopia, the official school age for secondary first cycle is from 15-16 years old.

GRAPH 3.1. FIVE YEARS GER TREND OF SECONDARY FIRST CYCLE (GRADE 9-10)

As shown in graph 3.1 above, GER of secondary first cycle was 36.9% (M=39.9%, F=33.9%) in 2005 E. C and slightly increased to 38.1% (M=42.0%, F=34.1%) by 2009 E.C. Even though the reasons for being static of GER were not yet identified through research, the rate is not in a position of improvement for the last five years. Thus, whatever the reason it needs serious attention from educational officials and concerned bodies.

TABLE 3.2. SECONDARY (9-10) GROSS ENROLMENT RATE AND GENDER EQUITY INDICATORS

The table 3.2 above also shows that, GER of 2009 E.C is 38.1% (M=42.0%, F=34.1%) for secondary school (9-10) at regional level by zone and administration town. Accordingly, seven zones and all administration towns have GER above the regional average, 38.1%. From the same table it is possible to see that there are fifteen administrative towns that have GER greater than 100%. Even though, the causes haven't been identified with basic research yet, the major suspected reason behind the exceeding 100% of GER in those administrative towns was that, students who are living in surrounding zones came to those towns to attend their high school education. This may led to the increment of enrolment in secondary education. That is why the rate goes beyond the expected rate when it is calculated in respect of school age population of those towns. Concerning GPI, nine zones and eight administrative towns have registered above the regional average, 0.81.

3.2.2 .Net Enrolment Rate (NER) in Secondary First Cycle (9-10)

For this level, we consider students enrolled in secondary first cycle whose age is from 15-16 and compare it to the total number of population belonging to the mentioned age group.

GRAPH 3.2. FIVE YEARS NER TREND OF SECONDARY FIRST CYCLE (9-10)

Graph 3.2 above indicates the NER of secondary education (9-10) of the last five years. It was 17.3% (M=17.4%, F=17.2) in 2005 E.C and rose to 17.5% (M=18.0, F=17.0%) in 2009. As the data indicates NER of the level didn't show significant change during the last five years. So, the issue needs attention from the education officials and concerned bodies.

Table 3.3 above shows that the NER of secondary first cycle (9-10) education at regional level by zone and administrative towns. Accordingly, the NER of the level at regional level is 17.5% (M=18.0, F=17.0% in 2009 E.C). Likewise, seven zones and all administrative towns have registered above the regional NER whereas; thirteen zones of the region have registered below the regional average of NER 17.5%. Specially, Borana, West Guji, OSZS Finfinne, West Harerge, West Arsi and East Harerge zones have NER less than 10%. On the other hand the NER of Dukem Administrative town exceeds 100% which is un logical. Therefore, the issue needs particular attention to improve the huge gap shown in these zones and un logical of those Dukem Administrative town.

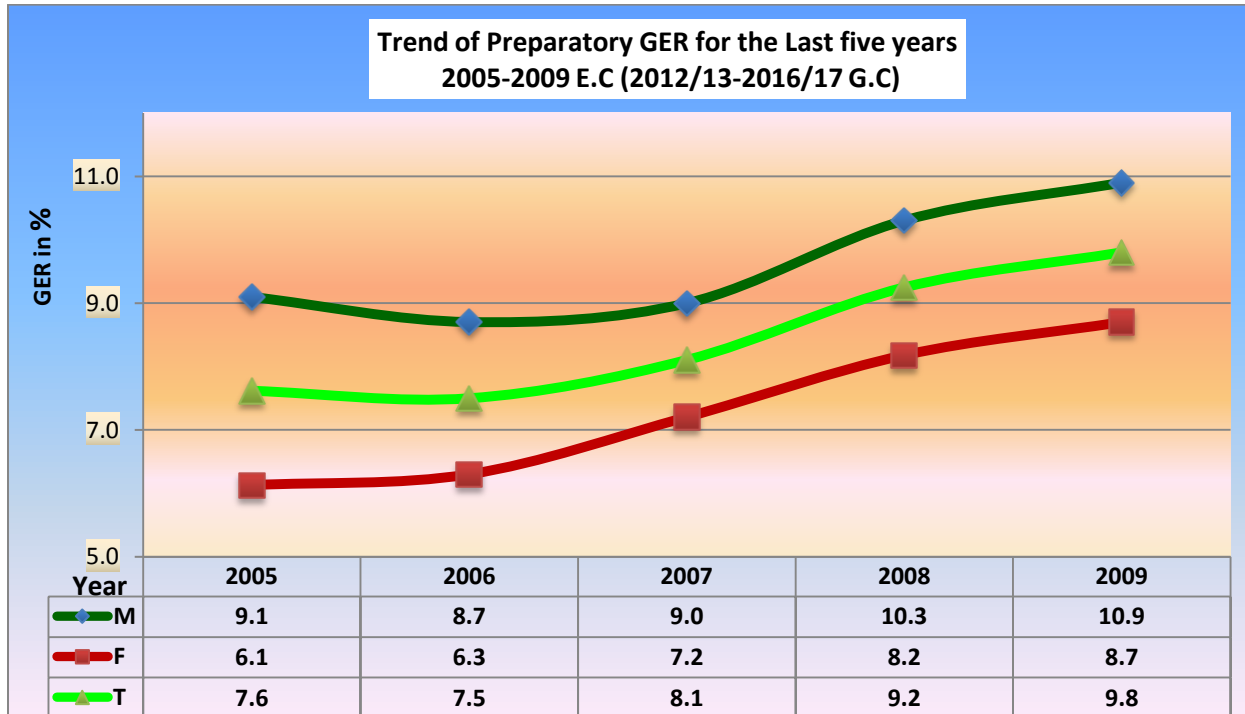

Concerning the gender gap, graph 3.3 below shows fluctuation of GG in the last five years. Accordingly, the gender gap of (9-10) has slightly decreased from 6% in 2005 to 5.5% in 2007 and then increased to 7.8% in 2009 E.C (2016/17 G.C).

GRAPH 3.3. FIVE YEARS TREND OF SECONDARY (9-10) GENDER GAP BY GER

3.2.3. Gross Enrolment Rate (GER) of Preparatory (11-12)

GRAPH 3.4. FIVE YEARS TREND OF GER FOR PREPARATORY (11-12)

As shown in graph 3.4 above, the GER of preparatory (11-12) has shown a little improvement in the last five years as it was 7.6 % (M=9.1%, F=6.1%) in 2005 and increased to 9.8% (M=10.9%, F=8.7%) in 2009 E.C (2015/16 G.C).

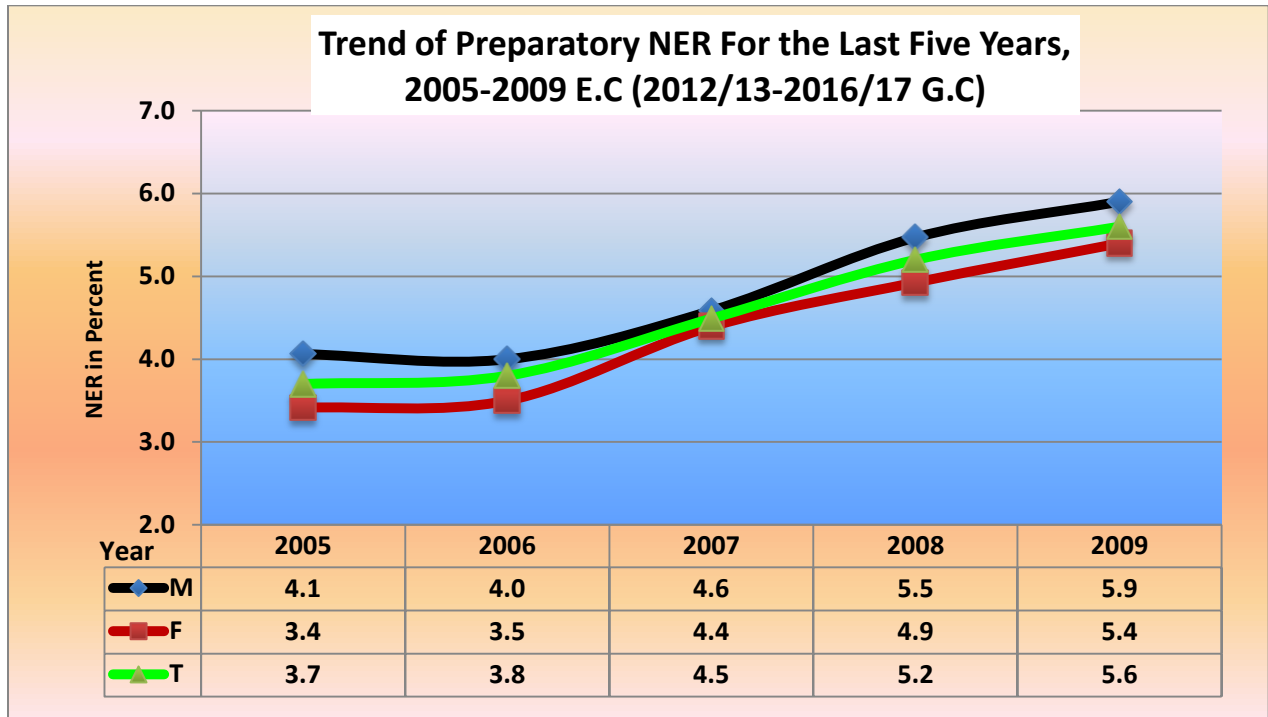

Table 3.4 below also shows the GER of preparatory by zones and administrative towns. As shown in the table, most of preparatory school student enrolment is concentrated in urban areas. Among all zones 15 of them have GER below the regional average, 9.8% and five zones have the lowest GER. The least GER registered zones are OSZS Finfinne (3.4), Bale (3.5) and West Hararge (3.7). On the other hand, five zones; Horo Guduru Wollega (32.1), West Wollega (30.9), East Wollega (17.9), Kellem Wollega (14.2) and West Shoa (12.1) have registered above the regional average. Regarding to administrative towns all of them have registered above the regional average GER 9.8. However, only Nekemte town (50.9) has registered above 50%, whereas; Gelan (11.0), Burayu (12.8) and Robe (14.0%) have registered the lowest GER of preparatory schools.

3.2.4. Net Enrolment Rate (NER) of Preparatory (11-12)

GRAPH 3.5. FIVE YEARS TREND OF PREPARATORY NER

As shown in graph 3.5 above, NER of Preparatory schools (11-12) has steadily increased for the last five years. For example, it was 3.7% (M=4.1, F=3.4%) in 2005 E.C and then rose to 5.6% (M=5.9%, F=5.4%) in 2009 E.C(2016/17 G.C)

In table 3.5 above, the NER and GPI of preparatory schools in 2009 E.C shown by zone and administrative towns. As illustrated in the table zone and administrative town's performance concerning NER is quite far apart from one another. Accordingly, the three high NER registered administrative towns are Dukem, Nekemte and Adama have 44.4%, 29.8% and 29.5% respectively. Whereas, Oromia Special Zone Surrounding Finfinne, West Guji, South West Shoa and Guji zones are the four least NER registered zones those have 1.2%, 1.8%, 1.8% and 1.9% respectively. Concerning gender parity index /GPI/, it has been 0.90 in 2008 E.C and this value is decreased to 0.92 in 2009 E.C.

3.2.5. Student Enrolment in Secondary Schools

3.2.5.1. Secondary & Preparatory schools (9-12) Enrolment by Ownership

3.3. Quality Indicators of Secondary Education

Major educational inputs that contribute a remarkable role to ensure quality of education are the availability of sufficient and qualified teachers, class size and text books. As compared to the primary education the percentage of qualified teachers, student-teacher ratio and student-section are better for secondary & preparatory education in the region. The minimum qualification required for first cycle and second cycle secondary school teachers is BA/BSc or Bed and MA/MSc.

3.3.1. Secondary Education Teachers qualification

Teacher to student ratio of secondary education (9-12) in 2009 (2016/17 G.C) at zone and administrative towns is shown in table 3.27 above. Accordingly, teacher to student ratio of secondary education (9-10) and (11-12) were 1:26 and 1:22 respectively. As data shows Borena, Buno Bedele & OSZS Finfinne Zones have the least teacher to student ratio in secondary first cycle (9-10) which are 1:11. On the other hand, Kellem Wollega, Arsi and West Shoa Zones have registered the highest teacher to student ratio which is 1:85, 1:51 and 1:50 respectively. In preparatory grades (11-12) Bale zone and Gelan town have the least teacher-student ratio which is 1:5 and 1:9 respectively.

As shown in table 3.28 above section to student ratio of secondary education (9--12) in 2009 (2016/17 G.C) were 1:63 and 1:53 respectively.

GRAPH 3.6. FIVE YEARS TREND OF SECONDARY (9-10) STUDENTS SECTION RATIO

As can be seen from graph 3.6 above, the trend of Student-Section ratio for secondary first cycle /9-10/ has been fluctuating from year to year. Accordingly; in 2005 it was 64:1 that tells us far from the standard and shows a slight improvement till 2007 to reach 59:1 and again rose to 63:1 in 2009.

The table 3.59 above illustrates that by 2009 (2016/17 G.C.) the repetition rate of secondary school (9-10) at regional level was 6.7% (M=7.5%, F=6.0%). Woredas in Borena and Guji zones have splitted to form a new zone called West Guji. So, it is impossible to calculate the efficiency of both zones. Nevertheless, other zones and administrative towns are having different average value than the regional average. For instance, Nekemte, Robe, Gelan and Sululta Administrative Towns have the lowest repetition rate, 0.6%, 1.6% and 2.7% respectively. On the other hand, South West Shoa, West Shoa zones and Ambo town have the highest repetition rate, 19.7%, 13.2% and 10.8% respectively.

This table also elaborates the repetition rate in preparatory school by indicating repetition rate, 4.0% (M=5.1%, F=3.0%), at regional level. The mean data have difference in values across the region. For instance, South West Shoa, West Shoa and East Hararge have the highest repetition rate of 21.5%, 12.6 % and 8.6 % respectively. On the other hand as the data shows; Batu, Sebeta and Shashemene Administrative Towns have no repeaters in the year.

Regarding to dropout, table 3.60 demonstrates that 17.9 % (M=16.6%, F=19.6%) and 10.0% (M=9.0%, F=11.3%) for grade 9th and 11th at Regional level respectively. The three zones that have largest dropout rate of grade 9 are East Hararg zone, Ambo and Nekemte administrative twons by having 27.8%, 26.5% and 24.8% respectively. For grade 11th the highest dropout was registered in East Shoa Zone, Ambo and Adama Administration towns, 25.4%, 17.4% and 16.0% respectively. Conversely, the least dropout for grade 9 was registered in Horo Guduru Wollega zone, Asella and Gelan Administrative Towns 5.0%, 4.8%, 5.9% and 8.1% respectively. Regarding to grade 11th Lege Tafo Lege Dadhi, Sebeta and Jimma Administrative Towns had the least dropout rate, which was 0.3 %, 0.7% and 1.2 % respectively.

4. None Formal Education

4.1. Alternative Basic Education /ABE/

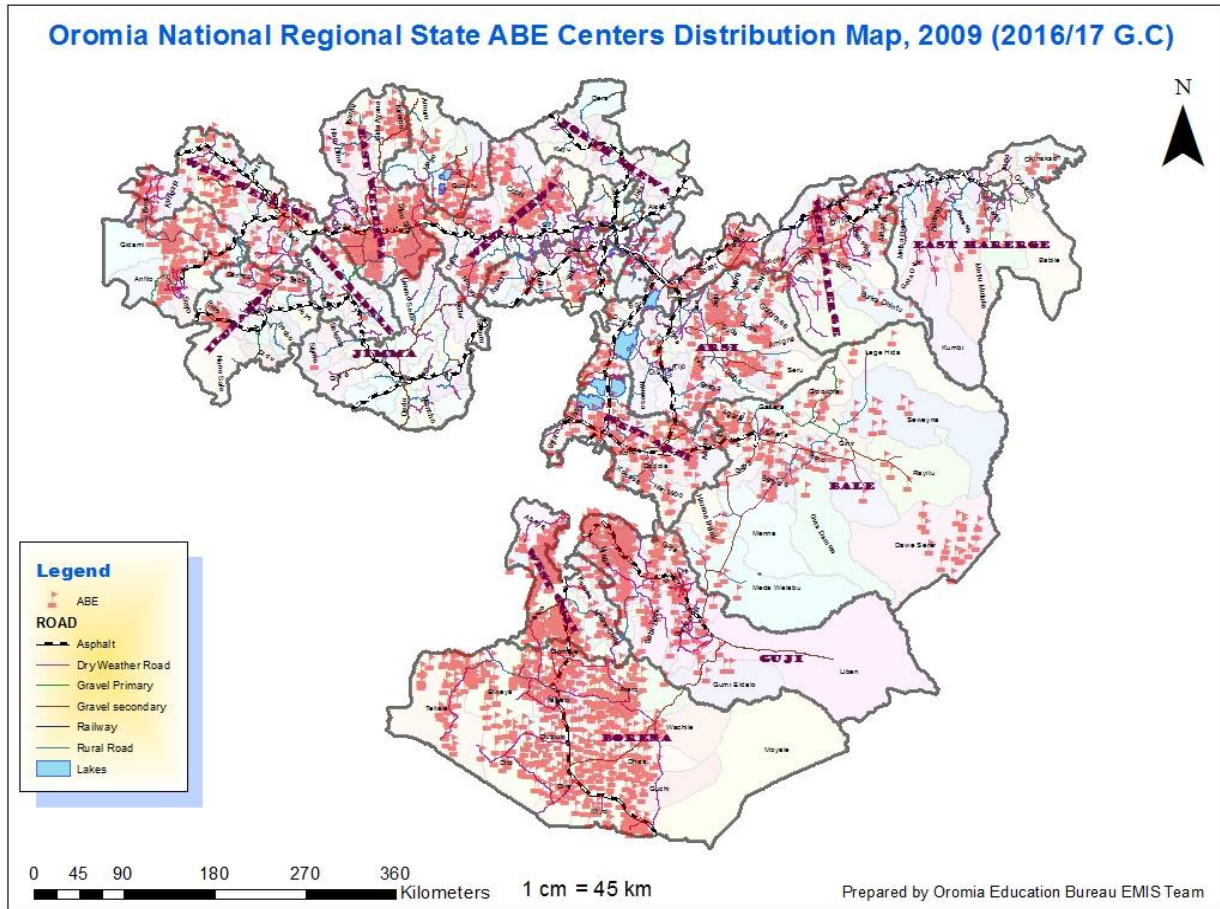

Basic education is the whole range of educational activities taking place in various settings (formal, non-formal and informal) that aimed to meet basic learning needs. The program should receive wide spread public support for reasons that include considerations of literacy as fundamental human right. As the fact indicates illiteracy accompanies poverty and a low life expectancy. Alternative Basic Education (ABE) is intended to address the Primary education needs of children who are substantially older than primary school ages of 7-14. Moreover, ABE enrollments have contribution in reporting GER and NER of 1st cycle primary with regular program. In paying attention for the issue, our region has planned to reduce illiteracy in this regard. Even though great efforts have made to meet the access, still hard work is expected to attain the plan. In this publication under this title we attempted to specify the data of Alternative Basic Education (ABE) and Integrated functional adult literacy (IFAL) program.

Table 4.1 below elaborates the number of ABE centers by ownership at regional, zonal and administrative towns. Accordingly, among the total number of 2360 ABE centers 94.6% (2232) of them are owned by government. The rest of them 5.4% (128) of them are under the ownership of non government organization. Concerning zonal distribution Borena, East Wollega and Guji (20.3%, 14.2% and 11.5%) have the largest share of ABE centers in the region. On the other hand the share of administrative towns is very low, and 8 administrative towns have no ABE centers.

MAP 7 MAP DISTRIBUTION OF ABE CENTERS

As can be seen from map 7 above, ABE centers are relatively dense in southern and western parts of the region. Specifically, they are common in Borena, Guji, West Arsi, East Wollega, Kellema and Arsi zone. On the other hand North Shoa, South West Shoa, Buno Bedelle, Jima and Ilu Aba Bora zones are zones where ABE centers are scarcely distributed.

Trend of ABE Enrolment

GRAPH 4.1. FIVE YEARS TREND OF ABE ENROLMENT

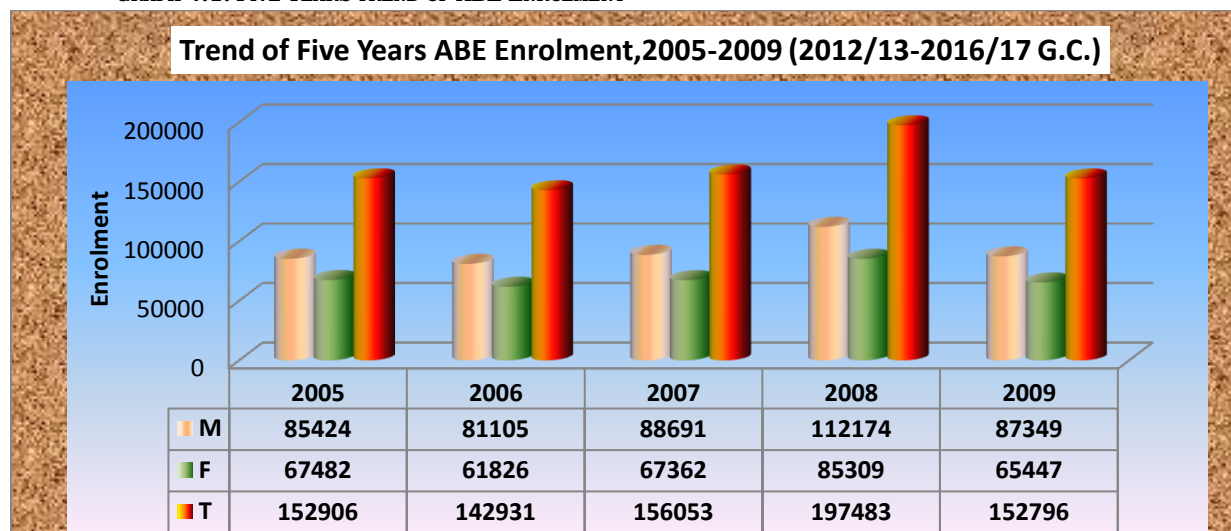

TABLE 4.2. FIVE YEARS TREND OF ABE ENROLMENT

Five Years Trend of ABE Enrolment, 2005-2009 (2012/13-2016/17 G.G.)			
Year in E.C	Number of ABE Enrolment		
	Male	Female	Total
2005	85424	67482	152906
2006	81105	61826	142931
2007	88691	67362	156053
2008	112174	85309	197483
2009	87349	65447	152796

As indicated on table 4.2, although ABE enrolment was slightly declined in 2006 when compared to 2005, it has shown increment in 2007 and 2008 and decreased in 2009. It is clear that this approach of addressing primary education significant, due attention has not been given to strengthen the sector. For example, practically hundreds of out of school children are still not joining the school system in the region. Hence, even though basic research didn't attempt to identify the cause yet, our assumption for the challenges happened might be; low community participation, low supervision and low follow-up of education sector at grass-root level, less interest and motivation of ABE facilitators, low participation of NGOs (both local and international) to promote the ABE program in the region and the like are the expected assumptions. Therefore, we recommend that, the issues needs serious attention and follow up.

Chapter Two

Tertiary Education

6. College of Teachers Education (CTE)

Colleges of Teachers' Education (CTE) are institutions those aimed to train teachers for primary schools. There are 12 CTEs in the region in 2009 E.C, those have been striving to fulfill the desired teachers in quality and quantity wise for the sector in regular, distance, evening and weekend diploma program, in addition to these instructions, they have been fully dedicated to in-service-training that helps TTI (certificate) teachers to upgrade to the Diploma level in summer program too.

In this publication enrolled, graduated and attrition of candidate teachers in different Diploma program as well as permanent and part time staff of CTEs are included.

6.1 Enrolment in Diploma Program

6.1.1 Enrolment in Regular Diploma Program

As can be seen from table 6.1 below of 12 CTEs, a total of 15,134 (7,494 male & 7,640 female) of which 50.48% are female candidate teachers were enrolled for regular diploma program, for three years study amongst; 12,964 (6,442 male & 6,522 female), 756 (329 male & 427 female) and 1,414 (723 male & 691 female) candidate teachers have been attending training in New modality, Cluster and Linear modalities respectively.
